Full Refund Guarantee: we value your every penny.

**NEW QUESTION: 1** Ein Projektmanager verwaltet ein Hybridprojekt Nach der Teilnahme an einer Iterationsüberprüfung teilt ein Stakeholder dem Projektmanager mit, dass er sehr beschäftigt ist, und fragt, warum diese Überprüfungen so häufig durchgeführt werden. Wie soll der Projektmanager reagieren?  
**A.** Verhandeln Sie mit dem Stakeholder über eine reduzierte Teilnahme an Überprüfungen und aktualisieren Sie den Stakeholder-Engagement-Plan, um diese reduzierte Teilnahme widerzuspiegeln  
**B.** Besprechen Sie mit den Stakeholdern die Vorteile des Hybridprojekts und wie häufige Überprüfungen zu mehr Wert und weniger Nacharbeit führen  
**C.** Notieren Sie das Problem im Problemprotokoll und leiten Sie den Konflikt zur Unterstützung an den Projektsponsor weiter  
**D.** Erklären Sie dem Stakeholder, dass der Stakeholder-Engagement-Plan die Teilnahme an allen Überprüfungen erfordert  
**Answer: B**

**NEW QUESTION: 2** A female client has been diagnosed with chronic renal failure. She is a candidate for either peritoneal dialysis or hemodialysis and must make a choice between the two. Which information should the nurse give her to help her decide?  
**A.** Hemodialysis involves less time to filter the blood; but the client must consider travel time, distance, and inconvenience.  
**B.** Peritoneal dialysis requires that a home health nurse prepare and administer the treatments.  
**C.** Hemodialysis involves more time to filter the blood than does peritoneal dialysis.  
**D.** Peritoneal dialysis has almost no complications and is less time consuming than hemodialysis. Therefore it is preferred.  
**Answer: A**  
**Explanation:** (A) Hemodialysis is faster in clearing the blood of toxins than peritoneal dialysis. However, clients must consider the time that they spend traveling to the dialysis center and the disruption in their daily lives. (B) Peritoneal dialysis requires several exchanges with dwelling time for the dialysate and therefore takes longer than hemodialysis. (C) Several serious complications of peritoneal dialysis include peritonitis, catheter displacement and/or plugging, or pain during dialysis. (D) A client can be taught to self-administer peritoneal dialysis without the aid of a professional.

**NEW QUESTION: 3** Sie haben ein Azure-Abonnement, das ein Benutzerkonto mit dem Namen Benutzer1 enthält. Sie müssen sicherstellen, dass Benutzer1 der

Mandantenstammverwaltungsgruppe eine Richtlinie zuweisen kann. Was sollte man tun? **A.** Erstellen Sie eine neue Verwaltungsgruppe und delegieren Sie Benutzer1 als Eigentümer der neuen Verwaltungsgruppe. **B.** Weisen Sie Benutzer1 die Eigentümerrolle für das Azure-Abonnement zu, und ändern Sie dann die Standardrichtlinien für den bedingten Zugriff. **C.** Weisen Sie Benutzer1 die globale Administratorrolle zu, und weisen Sie Benutzer1 an, die Zugriffsverwaltung für Azure-Ressourcen zu konfigurieren. **D.** Weisen Sie Benutzer1 die Eigentümerrolle für das Azure-Abonnement zu, und weisen Sie Benutzer1 an, die Zugriffsverwaltung für Azure-Ressourcen zu konfigurieren. **Answer: D**

**Explanation:** Explanation The following chart shows the list of roles and the supported actions on management groups. Note: Each directory is given a single top-level management group called the "Root" management group. This root management group is built into the hierarchy to have all management groups and subscriptions fold up to it. This root management group allows for global policies and Azure role assignments to be applied at the directory level. The Azure AD Global Administrator needs to elevate themselves to the User Access Administrator role of this root group initially. After elevating access, the administrator can assign any Azure role to other directory users or groups to manage the hierarchy. As administrator, you can assign your own account as owner of the root management group. Reference: <https://docs.microsoft.com/en-us/azure/governance/management-groups/overview>
