This is the most important aspect of our HPE7-A08 valid questions test, If you feel difficult for your certification exams, it is right for you to choose HP HPE7-A08 preparation labs.

### NEW QUESTION: 1

企業のWebサイトを使用して製品を一般に販売しています。サイトはApplication Load Balancer (ALB) の背後にあるAuto ScalingグループのAmazon EC2インスタンスで実行されています。AmazonCloudFrontディストリビューションもあり、AWS WAFがSQLインジェクション攻撃から保護するために使用されていますALBはCloudFrontディストリビューションの起源です。セキュリティログの最近のレビューにより、ウェブサイトへのアクセスをブロックする必要がある外部の悪意のあるIPが明らかになりました。ソリューションアーキテクトがアプリケーションを保護するために何をすべきですか？」 **A.** ALBの背後にあるターゲットグループのEC2インスタンスのネットワークACLを変更して、悪意のあるIPアドレスを拒否します**B.** AWS WAFの構成を変更して、悪意のあるIPアドレスをブロックするIP一致条件を追加します**C.** ALBの背後にあるターゲットグループのEC2インスタンスのセキュリティグループを変更して、悪意のあるIPアドレスを拒否します**D.** CloudFrontディストリビューションのネットワークACLを変更して、悪意のあるIPアドレスの拒否ルールを追加します **Answer: B** Explanation: A new version of the AWS Web Application Firewall was released in November 2019. With AWS WAF classic you create "IP match conditions", whereas with AWS WAF (new version) you create "IP set match statements". Look out for wording on the exam. The IP match condition / IP set match statement inspects the IP address of a web request's origin against a set of IP addresses and address ranges. Use this to allow or block web requests based on the IP addresses that the requests originate from. AWS WAF supports all IPv4 and IPv6 address ranges. An IP set can hold up to 10,000 IP addresses or IP address ranges to check. **CORRECT:** "Modify the configuration of AWS WAF to add an IP match condition to block the malicious IP address" is the correct answer. **INCORRECT:** "Modify the network ACL on the CloudFront distribution to add a deny rule for the malicious IP address" is incorrect as CloudFront does not sit within a subnet so network ACLs do not apply to it. **INCORRECT:** "Modify the network ACL for the EC2 instances in the target groups behind the ALB to deny the malicious IP address" is incorrect as the source IP addresses of the data in the EC2 instances' subnets will be the ELB IP addresses. **INCORRECT:** "Modify the security groups for the EC2 instances in the target groups behind the ALB to deny the malicious IP address." is incorrect as you cannot create deny rules with security groups. References: <https://docs.aws.amazon.com/waf/latest/developerguide/waf-rule-statement-type-ipset-match.html>

**NEW QUESTION: 2** Refer to the exhibit. An engineer has been tasked with rerouting packets flowing between the client and server via router B. The command `ip route 10.10.0.0 255.255.0.0 10.1.0.1` was executed on router B. What is the outcome of executing this command? **A.** Routes from the client to the server cease routing. **B.** Packets will be rerouted using the new static route. **C.** Routing is now asynchronous between the client and the server. **D.** Packets will continue to use the path between routers A and C. **Answer: D**

**NEW QUESTION: 3A. Option CB. Option AC. Option DD. Option BAnswer: B**
