Telemetry Processor is installed as a Windows service named "TelemetryProcessor." We recommend the following operating systems for computers that run TelemetryProcessor: For production environments For best performance, we recommend these operating systems: Windows Server 2008 Windows Server 2008 R2 Windows Server 2012 Windows Server 2012 R2 For test or small production environments You can use computers that run Windows 7, Windows 8, and Windows 8.1 in test environments and in small production environments. There is a limit of 20 concurrent connections for client operating systems, but in small environments, the agent randomization setting should minimize any chances of more than 20 agents connecting at one time.
