NEW QUESTION: 1 Review the following screen shot: In the Miscellaneous Items section, the user can enter several items (name/value pairs). Which type of property is used to display the list of items?
A. Value List **B.** Page **C.** Single Value **D.** Page List
Answer: D

NEW QUESTION: 2 During an audit, the client learns that the IS auditor has recently completed a similar security review at a competitor. The client inquires about the competitor's audit results. What is the BEST way for the auditor to address this inquiry?
A. Discuss the results of the audit omitting specifics related to names and products. **B.** Escalate the question to the audit manager for further action. **C.** Explain that it would be inappropriate to discuss the results of another audit client **D.** Obtain permission from the competitor to use the audit results as examples for future clients.
Answer: C

NEW QUESTION: 3 A user wants to configure a CloudWatch alarm on RDS to receive a notification when the CPU utilization of RDS is higher than 50%. Currently - at the time the user wants to create the alarm, there is some activity on RDS, such as RDS unavailability. How must the user proceed?
A. Setup the notification when the CPU is more than 75% on RDS **B.** It is not possible to setup the alarm on RDS under the circumstances **C.** Setup the notification when the state is Insufficient Data **D.** Setup the notification when the CPU utilization is less than 10%
Answer: C Explanation: Amazon CloudWatch alarms watch a single metric over a time period that the user specifies and perform one or more actions based on the value of the metric relative to a given threshold over a number of time periods. The alarm has three states: Alarm, OK and Insufficient data. The Alarm will change to InsufficientData when any of the three situations arise: when the alarm has just started, when the metric is not available or when enough data is not available for the metric to determine the alarm state. If the user wants to find that RDS is not available, he can setup to receive the notification when the state is in Insufficient data. Reference:
