NEW QUESTION: 1Which two statements are true when row archival management is enabled?

A. The ORA_ARCHIVE_STATE column visibility is controlled by the ROW ARCHIVALVISIBILITY session parameter.**B.** The ROW ARCHIVAL VISIBILITY session parameter defaults to active rows only.**C.** The ORA_ARCHIVE_STATE column is updated manually or by a program that could reference activity tracking columns, to indicate that a row is no longer considered active.**D.** The ORA_ARCHIVE_STATE column is updated automatically by the Oracle Server based on activity tracking columns, to Indicate that a row is no longer considered active.**E.** The ORA_ARCHIVE_STATE column is visible if referenced in the select list of a query.**Answer: A,C**
Explanation:A: Below we see a case where we set the row archival visibility parameter to "all" thereby allowing us to see all of the rows that have been logically deleted:
alter session set row archival visibility = all;
We can then turn-on row invisibility back on by changing row archival visibility = "active":
alter session set row archival visibility = all;
B: To use ora_archive_state as an alternative to deleting rows, you need the following settings and parameters:
1 . Create the table with the row archival clause
create table mytab (col1 number, col2 char(200)) row archival;
2 . Now that the table is marked as row archival, you have two methods for removing rows, a permanent solution with the standard delete DML, plus the new syntax where you set ora_archive_state to a non-zero value:
update mytab set ora_archive_state=2 where col2='FRED';
3. To make "invisible rows" visible again, you simply set the rows ora_archive_state to zero:
update mytab set ora_archive_state=0 where col2='FRED';
Note:* Starting in Oracle 12c, Oracle provides a new feature that allow you to "logically delete" a row in a table without physically removing the row. This effectively makes deleted rows "invisible" to all SQL and DML, but they can be revealed at any time, providing a sort of "instant" rollback method.
To use ora_archive_state as an alternative to deleting rows.

NEW QUESTION: 2According to Apple service manuals, what steps should you take before performing any take-apart steps when replacing a part in any Apple product?
A. Gather all necessary tools and perform all preliminary steps.**B.** Discharge the CRT and establish an ongoing ground.**C.** Disconnect and reconnect all internal cables.**D.** Lay the product on its side so it will not fall over.**E.** Order all available service parts for the appropriate configuration of the product.**Answer: A**

NEW QUESTION: 3You are migrating a legacy client-server application to AWS. The application

responds to a specific DNS domain (e.g. www.example.com) and has a 2-tier architecture, with multiple application servers and a database server. Remote clients use TCP to connect to the application servers. The application servers need to know the IP address of the clients in order to function properly and are currently taking that information from the TCP socket. A Multi-AZ RDS MySQL instance will be used for the database. During the migration you can change the application code, but you have to file a change request. How would you implement the architecture on AWS in order to maximize scalability and high availability?
A. File a change request to implement Alias Resource support in the application. Use Route 53 Alias Resource Record to distribute load on two application servers in different Azs.
B. File a change request to implement Proxy Protocol support in the application. Use an ELB with a TCP Listener and Proxy Protocol enabled to distribute load on two application servers in different Azs.
C. File a change request to implement Cross-Zone support in the application. Use an ELB with a TCP Listener and Cross-Zone Load Balancing enabled, two application servers in different AZs.
D. File a change request to implement Latency Based Routing support in the application. Use Route 53 with Latency Based Routing enabled to distribute load on two application servers in different Azs.
Answer: B
