If you're skeptical about our SAP C_HAMOD_2404 exam dumps, you are more than welcome to try our demo for free and see what rest of the CCT C_HAMOD_2404 exam applicants experience by availing our products.

NEW QUESTION: 1 In einem neu gebildeten Projektteam ist ein erfahrenes Teammitglied von der Komplexität der Aufgaben überwältigt und mit dem Projektteam nicht zufrieden. Was soll der Projektmanager tun?**A.** Richten Sie mit den Mitgliedern des Projektteams Teambuilding-Aktivitäten ein, um Spannungen abzubauen**B.** Bitten Sie das Teammitglied, diese potenzielle Zeitplanverzögerung in das Risikoregister einzutragen.**C.** Erklären Sie, dass die Aufgaben unvermeidbar sind, und bitten Sie das Teammitglied, eine Lösung zu finden, um die Herausforderungen zu bewältigen**D.** Hören Sie dem Teammitglied aktiv zu und ermitteln Sie Möglichkeiten, um seine Anforderungen bei der Erledigung der Aufgaben zu unterstützen.
Answer: D

NEW QUESTION: 2 You are building a large-scale confidential documentation web server on AWS and all of the documentation for it will be stored on S3. One of the requirements is that it cannot be publicly accessible from S3 directly, and you will need to use CloudFront to accomplish this. Which of the methods listed below would satisfy the requirements as outlined? Choose an answer from the options below Please select:**A.** Create an S3 bucket policy that lists the CloudFront distribution ID as the Principal and the target bucket as the Amazon Resource Name (ARN).**B.** Create an Identity and Access Management (IAM) user for CloudFront and grant access to the objects in your S3 bucket to that IAM User.**C.** Create an Origin Access Identity (OAI) for CloudFront and grant access to the objects in your S3 bucket to that OAI.**D.** Create individual policies for each bucket the documents are stored in and in that policy grant access to only CloudFront.**Answer: C**
Explanation: If you want to use CloudFront signed URLs or signed cookies to provide access to objects in your Amazon S3 bucket you probably also want to prevent users from accessing your Amazon S3 objects using Amazon S3 URLs. If users access your objects directly in Amazon S3, they bypass the controls provided by CloudFront signed URLs or signed cookies, for example, control over the date and time that a user can no longer access your content and control over which IP addresses can be used to access content. In

addition, if user's access objects both through CloudFront and directly by using Amazon S3 URLs, CloudFront access logs are less useful because they're incomplete. Option A is invalid because you need to create an Origin Access Identity for CloudFront and not an IAM user. Option C and D are invalid because using policies will not help fulfill the requirement. For more information on Origin Access Identity please see the below link:
<http://docs.aws.amazon.com/AmazonCloudFront/latest/DeveloperGuide/private-content-restrictive-access-to-s3.html> The correct answer is: Create an Origin Access Identity (OAI) for CloudFront and grant access to the objects in your S3 bucket to that OAI. (Submit your Feedback/Queries to our Experts)

NEW QUESTION: 3 Wie können Testausführungstools bei Erkundungstests von größtem Nutzen sein? **A.** Sie können Benutzeraktionen aufzeichnen, damit Fehler leichter wiederhergestellt werden können. **B.** Sie können datengesteuerte Tests verwenden, um die Anzahl der durchgeführten Erkundungstests zu erhöhen. **C.** Sie können verwendet werden, um die Regressionsaspekte von Erkundungstests durchzuführen. **D.** Sie können dazu beitragen, das Risiko einer geringen Testabdeckung zu verringern. **Answer: A** Explanation: Exploratory testing is used when it is unclear what the system is supposed to do. Therefore test execution tools are of little use because expected results cannot be predicted. However, the record feature of a test execution tool can be used to log the actions performed so that defects can be recreated (option (A)) and rectified more easily.
