http://www.juniper.net/documentation/en_US/junos13.3/topics/reference/command-summary/ping-atm.html

NEW QUESTION: 3**A.** Option A**B.** Option C**C.** Option B**D.** Option D**Answer: C****Explanation:**
ExplanationExplanation/Reference:
https://www.cisco.com/c/en/us/products/collateral/ios-nx-os-software/identity-based-networking-services/config_guide_c17-663759.html When the inactivity timer is enabled, the switch monitors the activity from authenticated endpoints. When the inactivity timer expires, the switch removes the authenticated session. The inactivity timer for MAB can be statically configured on the switch port, or it can be dynamically assigned using the RADIUS Idle-Timeout attribute (Attribute 28). Cisco recommends setting the timer using the RADIUS attribute because this approach lets gives you control over which endpoints are subject to this timer and the length of the timer for each class of endpoints. For example, endpoints that are known to be quiet for long periods of time can be assigned a longer inactivity timer value than chatty endpoints.

NEW QUESTION: 4A company just implemented a new telework policy that allows employees to use personal devices for official email and file sharing while working from home. Some of the requirements are: * Employees must provide an alternate work location (i.e., a home address). * Employees must install software on the device that will prevent the loss of proprietary data but will not restrict any other software from being installed. Which of the following BEST describes the MDM options the company is using?**A.** Application management, remote wipe, geofencing, context-aware authentication, and containerization**B.** Geofencing, content management,

remote wipe, containerization, and storage segmentation
C. Remote wipe, geolocation, screen locks, storage segmentation, and full-device encryption
D. Content management, remote wipe, geolocation, context-aware authentication, and containerization
Answer: A
