NEW QUESTION: 1An Antivirus Security Profile specifies Actions and WildFire Actions. Wildfire Actions enable you to configure the firewall to perform which operation?**A.** Download new antivirus signatures from WildFire.**B.** Upload traffic to WildFire when a virus is suspected.**C.** Block traffic when a WildFire virus signature is detected.**D.** Delete packet data when a virus is suspected.**Answer: C**

NEW QUESTION: 2Which statement describes the supported integration method when Cisco Unity Connection and Cisco Unified Communications Manager are installed on the same server as Cisco Unified Communications Manager Business Edition?**A.** Only SIP integration is supported.**B.** Q-Sig integration is supported through a voice-enabled Cisco ISR router.**C.** Both SCCP or SIP integration are supported, but you must choose one or the other.**D.** Circuit-switched integration is supported through PIMG.**E.** Only SCCP integration is supported.**Answer: E****Explanation:**Explanation/Reference:Explanation: When installed on the same server there is no way to create trunk that is why sccp is the only way Cisco Unity Connection and Cisco Unified Communications Manager are installed on the same server.

NEW QUESTION: 3Your company corporate telephony environment is a combination of Lync 2013 and traditional Private Branch Exchange (PBX). The company has 3,500 users at three sites that are connected by a Multiprotocol Label Switching (MPLS) topology. On average, the company has 10 percent of its users in conferences and 15 percent on a public switched telephone network (PSTN) call at any time. The company is planning to deploy Wi-Fi solutions for all offices and move all Lync communications through the wireless network. You are concerned about the quality of voice traffic through the wireless network. You plan to generate and collect simulated traffic through the wireless network to determine if the traffic is affected by going through the wireless network. You need to determine if there is any degradation of service through the simulated traffic on the wireless network. Which piece of information should you generate and collect?**A.** Wi-Fi Multimedia Power Save**B.** Wi-Fi Multimedia Quality of Service (WMM QoS)**C.** Wi-Fi Multimedia Quality of Experience (WMM QoE)**D.** Wi-Fi Multimedia Call Data Record (WMM CDR)**Answer: B****Explanation:**WMM QoS enables real-time media workloads to implement a higher QoS setting-in particular, for voice traffic over Wi-Fi. Delivering Lync 2013 Real-Time Communications over Wi-Fi
