Our 312-38 test torrent questions are integral parts of your studying process to obtain the professional qualification, and many customers get used to choosing our 312-38 reliable braindumps when they need other materials and make second purchase, which is the common thing.

NEW QUESTION: 1 다음 중 코어 분리에 사용되는 운동은? **A.** 푸시 버튼 **B.** 측면 판 **C.** 스퀘트 **D.** 스 내치
Answer: B

NEW QUESTION: 2 A. Option B **B.** Option E **C.** Option C **D.** Option F **E.** Option A
Answer: B, C, D Explanation: Explanation Since all logs need to be stored indefinitely. Glacier is the best option for this. One can use Lifecycle events to stream the data from S3 to Glacier Lifecycle configuration enables you to specify the lifecycle management of objects in a bucket. The configuration is a set of one or more rules, where each rule defines an action for Amazon S3 to apply to a group of objects. These actions can be classified as follows: * Transition actions - In which you define when objects transition to another storage class. For example, you may choose to transition objects to the STANDARD_IA (for infrequent access) storage class 30 days after creation, or archive objects to the GLACIER storage class one year after creation. * Expiration actions - In which you specify when the objects expire. Then Amazon S3 deletes the expired objects on your behalf. For more information on Lifecycle events, please refer to the below link: * <http://docs.aws.amazon.com/AmazonS3/latest/dev/object-lifecycle-mgmt.html> You can use scripts to put the logs onto a new volume and then transfer those logs to S3. Note: Moving the logs from CBS volume to S3 we have some custom scripts running in the background. In order to ensure the minimum memory requirements for the OS and the applications for the script to execute we can use a cost effective ec2 instance. Considering the computing resource requirements of the instance and the cost factor a t2.micro instance can be used in this case. The following link provides more information on various t2 instances. <https://docs.aws.amazon.com/AWSEC2/latest/WindowsGuide/t2-instances.html> Question is "How would you meet these requirements in a cost-effective manner? Choose three answers from the options below" So here user has to choose the 3 options so that the requirement is fulfilled. So in the given 6 options, options C, C and F fulfill the requirement." The CC2s use CBS volumes and the logs are stored on CBS volumes those are marked for non-termination" - is one of the way to fulfill requirement. So this shouldn't be an issue.

NEW QUESTION: 3 An analyst needs to identify the applications a user was running and the files that were open before the user's computer was shut off by holding down the power button. Which of the following would MOST likely contain that information? **A.** Pagefile **B.** RAM **C.** NGFW **D.** NetFlow
Answer: D

NEW QUESTION: 4 Which three of the following are ClusterXL member requirements? 1) same operating systems 2) same Check Point version 3) same appliance model 4) same policy
A. 2, 3, and 4
B. 1, 2, and 3
C. 1, 3, and 4
D. 1, 2, and 4
Answer: D
