NEW QUESTION: 1A. Azure Security Center and Azure Data Lake Store.**B.** Azure Application Insight and Azure Log Analytics**C.** Azure Site Recovery and Microsoft Operations Management Suite.**D.** Azure Data Lake Analytics and Microsoft Operations Management Suite.**Answer: B**

NEW QUESTION: 2Hinweis: Diese Frage ist Teil einer Reihe von Fragen, bei denen die gleichen oder ähnliche Antwortmöglichkeiten verwendet werden. Eine Antwortauswahl kann für mehr als eine Frage in der Reihe richtig sein. Jede Frage ist unabhängig von den anderen Fragen in dieser Reihe. Informationen und Details in einer Frage gelten nur für diese Frage.Sie müssen eine neue Microsoft SQL Server-Umgebung bereitstellen, die die folgenden Anforderungen erfüllt:* Die SQL Server-Instanz muss hoch verfügbar sein.* Während eines Hardwarefehlers oder der Wartung des Betriebssystems müssen minimale Ausfallzeiten auftreten.* Alle Sicherheitseinstellungen auf Instanzebene und SQL Server Agent-Jobs müssen ohne zusätzliche verfügbar sein* Synchronisationsaufgaben.Was sollten Sie implementieren?**A.** ein Dateifreigabezeuge**B.** eine Microsoft Azure Stretch-Datenbank**C.** Eine Always On Availability-Gruppe mit sekundären Replikaten im asynchronen Festschreibungsmodus**D.** Eine Always On Availability-Gruppe mit allen Replikaten im Synchron-Commit-Modus**E.** Eine Microsoft SQL Server-Failoverclusterinstanz (FCI)**F.** Ein Windows-Cluster mit einer Shared-Nothing-Architektur**G.** Protokollversand**Answer: E**Explanation:ExplanationAs part of the SQL Server Always On offering, Always On Failover Cluster Instances leverages Windows Server Failover Clustering (WSFC) functionality to provide local high availability through redundancy at the server-instance level-a failover cluster instance (FCI). An FCI is a single instance of SQL Server that is installed across Windows Server Failover Clustering (WSFC) nodes and, possibly, across multiple subnets.When there is hardware or software failure of a server, the applications or clients connecting to the server will experience downtime. When a SQL Server instance is configured to be an FCI (instead of a standalone instance), the high availability of that SQL Server instance is protected by the presence of redundant nodes in the FCI.References:

NEW QUESTION: 3

AWSに移行したときに、アプリケーションのパフォーマンスを向上させるソリューションはどれですか？ **A.** Amazon

AuroraMySQLマルチAZDBクラスターを作成します。クラスターのバックアップインスタンスをレポートのエンドポイントとして使用するようアプリケーションを構成します。 **B.**

プロビジョニングされた容量を持つAmazonDynamoDBテーブルにデータをインポートします。レポートにDynamoDBを使用するようにアプリケーションをリファクタリングします。C. コンピューティングに最適化されたAmazonEC2インスタンスでデータベースを作成します。コンピューティングリソースがオンプレミスデータベースを超えていることを確認しますD. 複数のリードレプリカを使用してAmazon Aurora MySQL Multi-AZDBクラスターを作成します。リーダーエンドポイントのレポートを使用するようにアプリケーションを構成します。Answer: D

NEW QUESTION: 4 Sie haben 1.000 Computer, auf denen Windows 10 ausgeführt wird und die Mitglied einer Active Directory-Domäne sind. Sie erstellen einen Arbeitsbereich in Microsoft Azure Log Analytics. Sie müssen die Ereignisprotokolle von den Computern in Azure erfassen. Was sollte man tun? Um zu antworten, wählen Sie die entsprechenden Optionen im Antwortbereich aus. HINWEIS: Jede richtige Auswahl ist einen Punkt wert. Answer: Explanation: Explanation Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/agent-windows> Topic 2, Litware inc This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Existing Environment Current Business Model The Los Angeles office has 500 developers. The developers work flexible hours ranging from 11:00 to 22:00. Litware has a Microsoft System Center 2012 R2 Configuration Manager deployment. During discovery, the company discovers a process where users are emailing bank account information of its customers to internal and external recipients. Current Environment The network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The functional level of the forest and the domain is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2. Litware has the computers shown in the following table. The development department uses projects in Azure DevOps to build applications. Most of the employees in the sales department are contractors. Each contractor is assigned a computer that runs Windows 10. At the end of each contract, the computer is assigned to different contractor. Currently, the computers are re-provisioned manually by the IT department. Problem Statements Litware identifies the following issues on the network: * Employees in the Los Angeles office report slow Internet performance when updates are downloading. The employees also report that the updates frequently consume considerable resources when they are installed. The Update settings are configured as shown in the Updates exhibit. (Click the Updates button.) * Management suspects that the source code for the proprietary applications in Azure DevOps is being shared externally. * Re-provisioning the sales department computers is too time consuming. Requirements Business Goals Litware plans to transition to co-management for all the company-owned Windows 10 computers. Whenever possible, Litware wants to minimize hardware and software costs. Device Management Requirements Litware identifies the following device management requirements: * Prevent the sales department employees from forwarding email that contains bank account information. * Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in. * Prevent employees in the

research department from copying patented information from trusted applications to untrusted applications. Technical Requirements Litware identifies the following technical requirements for the planned deployment: * Re-provision the sales department computers by using Windows AutoPilot. * Ensure that the projects in Azure DevOps can be accessed from the corporate network only. * Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days. * Ensure that the company name and logo appears during the Out of Box Experience (OOBE) when using Windows AutoPilot. Exhibits
