NEW QUESTION: 1Your organization has developed and deployed several Azure App Service Web and API applications. The applications use Azure Key Vault to store several authentication, storage account, and data encryption keys. Several departments have the following requests to support the applications: You need to recommend the appropriate Azure service for each department request. What should you recommend? To answer, configure the appropriate options in the dialog box in the answer area. NOTE: Each correct selection is worth one point.

Answer: Explanation: Explanation

NEW QUESTION: 2A. Option AB. Option CC. Option DD. Option B **Answer: A,B**

NEW QUESTION: 3Given the following data model, the Address property should be defined as: A. A page B. There is not enough Information to make this decision C. A value list D. A page list

Answer: D

NEW QUESTION: 4A. Domain local groups B. Universal groups C. Users D. Computers E. Global groups **Answer: C,E** Explanation: First off, your domain functional level must be at Windows Server 2008. Second, Fine-grained password policies ONLY apply to user objects, and global security groups. Linking them to universal or domain local groups is ineffective. I know what you're thinking, what about OU's? Nope, Fine-grained password policy cannot be applied to an organizational unit (OU) directly. The third thing to keep in mind is, by default only members of the Domain Admins group can set fine-grained password policies. However, you can delegate this ability to other users if needed. Fine-grained password policies apply only to user objects (or inetOrgPerson objects if they are used instead of user objects) and global security groups. You can apply Password Settings objects (PSOs) to users or global security groups: <http://technet.microsoft.com/en-us/library/cc731589%28v=ws.10%29.aspx> <http://technet.microsoft.com/en-us/library/cc731589%28v=ws.10%29.aspx> <http://www.brandonlawson.com/active-directory/creating-fine-grained-password-policies/>
