Our Clients are entitled to free updates after they complete the purchase.

**NEW QUESTION: 1** You are creating a new portfolio scenario. You are attempting to save it for all users, but the selection is unavailable (grayed out). What is the cause? **A.** You have insufficient portfolio security privileges. **B.** You have insufficient project security privileges. **C.** You have insufficient user security privileges. **D.** You have insufficient global security privileges. **Answer: D**  
Explanation: Explanation/Reference: Global profiles: Define a user's access to application-wide information and settings, such as the enterprise project structure (EPS), resources, roles, and cost accounts. Each user must be assigned a global profile. Incorrect answers: B: Project profiles Define a user's access to project-specific information. It is not required that each user be assigned a project profile; however, users cannot access projects unless they are assigned: a project profile, the global profile Admin Superuser, as a resource assignment when they are a project owner, or as a resource assignment when they have Team Member module access. Reference; P6 EPPM Administrator's Guide, Security Concepts in P6 EPPM

### NEW QUESTION: 2
