The content of the trial version is a small part of our D-DLM-A-01 practice questions, and it is easy and convenient to free download.

NEW QUESTION: 1 Joe is the record owner of a lead. A lead sharing rule has been defined so that leads owned by Joe are shared with the public group called Joe's team. When the lead is converted to an account, contact, and opportunity, who will have access to these records assuming that a private sharing model is in place on these objects and there are no sharing rules defined for those objects? **A.** Joe and anyone above him in the role hierarchy will be able to access the three records. **B.** Joe, all members of the public group, and Joe's team will be able to access the three records. **C.** Joe will be the only person who is able to access the account, contact, and opportunity records. **D.** Joe, all members of the public group, Joe's team, and anyone above any group member in the hierarchy will be able to access the three records. **Answer: A**

NEW QUESTION: 2 You are planning projects for three customers. Each customer's preferred process for work items is shown in the following table. The customers all plan to use Azure DevOps for work item management. Which work item process should you use for each customer? To answer, drag the appropriate work item process to the correct customers. Each work item process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: Explanation: Box 1: Scrum Choose Scrum when your team practices Scrum. This process works great if you want to track product backlog items (PBIs) and bugs on the Kanban board, or break PBIs and bugs down into tasks on the taskboard. Box 2: Agile Choose Agile when your team uses Agile planning methods, including Scrum, and tracks development and test activities separately. This process works great if you want to track user stories and (optionally) bugs on the Kanban board, or track bugs and tasks on the taskboard. Box 3: CMMI Choose CMMI when your team follows more formal project methods that require a framework for process improvement and an auditable record of decisions. With this process, you can track requirements, change requests, risks, and reviews. **Incorrect Answers:** XP: The work tracking objects contained within the default DevOps processes and DevOps process templates are Basic, Agile, CMMI, and Scrum XP (Extreme Programming) and DevOps are different things. They don't contradict with each other, they can be used together, but they have different base concepts inside them. **References:**
