We believe that business can last only if we fully [Senior-Internal-Corrosion-Technologist Practice Mock](#) consider it for our customers, so we will never do anything that will damage our reputation.

NEW QUESTION: 1In a campus environment, where are encryption keys sent or stored when users roam between tunneled mode APs on the same controller using 802.1X?**A.** stored on the RADIUS server**B.** stored on the controller**C.** sent to the new AP via IPsec**D.** sent to the new AP via GRE**E.** original AP sends keys to new AP**Answer: B**

NEW QUESTION: 2A network administrator is troubleshooting an EIGRP connection between RouterA, IP address 10.1.2.1, and RouterB, IP address 10.1.2.2.Given the debug output on RouterA, which two statements are true?**A.** RouterA received a hello packet with mismatched metric-calculation mechanisms.**B.** RouterA received a hello packet with mismatched autonomous system numbers.**C.** RouterA received a hello packet with mismatched hello timers.**D.** RouterA received a hello packet with mismatched authentication parameters.**E.** RouterA will not form an adjacency with RouterB.**F.** RouterA will form an adjacency with RouterB.**Answer: A, E**Explanation:Explanation/Reference:Explanation:If the k-value mismatch occurs, Router A will never form an adjacency with Router B since it is one of the basic requirements of adjacency. If you see the exhibit, Router A received HELLO packet with a mismatched metric.

NEW QUESTION: 3A. Option AB. Option CC. Option B**Answer: A**

NEW QUESTION: 4Your network contains a server named Server1 that runs Windows Server 2008 R2. Server1 has the Remote Desktop Session Host (RD Session Host) role service and the Windows System Resource Manager (WSRM) feature installed.Users from two Active Directory groups named Group1 and Group2 connect to Server1 and run the same RemoteApp program. You need to ensure that when Server1 experiences high CPU usage, Group1 users have priority over Group2 users regarding the use of CPU resources. You want to achieve this goal by using the minimum amount of administrative effort.What should you do from the WSRM console?**A.** Implement Weighted_Remote_Sessions.**B.** Create a new Calendar Schedule.**C.** Add a new Conditional Policy.**D.** Create a new Process Matching criteria.**Answer: A**Explanation:When the Weighted_Remote_Sessions resource allocation policy is managing the system, the processes are grouped according to the priority assigned with the user account. For example, if three users are remotely connected, the user assigned Premium priority will receive highest priority access to the CPU, the user assigned Standard priority will receive second priority to the CPU, and the user assigned Basic priority will receive lowest priority to the CPU. This policy is for use with RD Session Host servers.Source:
