NEW QUESTION: 1 Because the operating system itself are quite different, each multi-path software compatible systems under different operating system versions, and even different versions of the same operating system, there may be a different version of the multi-path, multi-path and therefore before installing the software, need to check the version supporting table, make sure the multi-path and OS, HBA card compatibility. **A. True B. False Answer: A**

NEW QUESTION: 2 **A. Option D B. Option C C. Option B D. Option A Answer: B** Explanation: Auto Scaling performs various processes, such as Launch, Terminate, Availability Zone Rebalance (AZRebalance. etc. The AZRebalance process type seeks to maintain a balanced number of instances across Availability Zones within a region. If the user suspends the Terminate process, the AZRebalance process can cause the Auto Scaling group to grow up to ten percent larger than the maximum size. This is because Auto Scaling allows groups to temporarily grow larger than the maximum size during rebalancing activities. If Auto Scaling cannot terminate instances, the Auto Scaling group could remain up to ten percent larger than the maximum size until the user resumes the Terminate process type.

NEW QUESTION: 3 Which statement best describes HP VDI reference architectures for midmarket businesses? **A. They are monolithic designs that implement HP-only products. B. Although they are written for enterprise customers. HP VDI reference architectures can be adapted to mid-sized businesses. C. They provide general suggestions for do-it-yourself client virtualization implementations. D. They provide end-to-end solutions that are fully-tested, customizable, do-it-yourself blueprints for midmarket businesses. Answer: D**
