NEW QUESTION: 2 When items aren't automatically assigned for intercompany reconciliation (ICR), how do you perform reconciliation?
A. Use SAP Leonardo machine learning algorithms.
B. Export line item reports for each affiliate.
C. Match items manually.
D. Use an automated assignment rule.
Answer: C,D
Explanation: After the system matches and assigns as many items as it can, it provides a list of unmatched items. Here you either match the items completely manually or use one of the automatic assignment rules available (based on document reference, amount, and currency). You don't have to go through endless lists of line item reports because the items are displayed directly in the flexible matching screen. SAP Leonardo and machine learning are ideal for performing matching tasks like this; however, there is no such app developed currently for matching ICR.
