NEW QUESTION: 1All of the following are advantages of using traditional financial ratios for analysis EXCEPT:**A.** they allow comparisons to be made between like companies.**B.** they usually reflect accounting rather than economic values.**C.** they can be used to view historical trends and availability over time.**D.** they can easily be computed from the information found in publicly available financial reports.**Answer: B**

NEW QUESTION: 2When would an organization review a Business Continuity Management (BCM) system?**A.** When personnel changes occur**B.** At planned intervals**C.** Before and after Disaster Recovery (DR) tests**D.** When major changes occur on systems**Answer: B**

NEW QUESTION: 3Refer to the exhibit.Every switch in the exhibit will route traffic.The company requires a topology in which failover for switch-to-switch links is exclusively handled by the routing protocol and occurs as quickly as possible. Which topology should the administrator use?**A.** CB. DC. BD. A**Answer: C**

NEW QUESTION: 4Which three values can be used to tag external EIGRP routes? (Choose three.)**A.** The cost to reach the router that redistributed the route**B.** The protocol ID of the external protocol**C.** The router ID of the router from which the external protocol route was learned**D.** The metric from the external protocol**E.** The router ID of the router that redistributed the route**F.** The administrative distance of the external protocol**Answer: B,C,D,E****Explanation:** EIGRP has the notion of internal and external routes. Internal routes are ones that have been originated within an EIGRP autonomous system (AS). Therefore, a directly attached network that is configured to run EIGRP is considered an internal route and is propagated with this information throughout the EIGRP AS. External routes are ones that have been learned by another routing protocol or reside in the routing table as static routes. These routes are tagged individually with the identity of their origination.External routes are tagged with the following information:The router ID of the EIGRP router that redistributed the route.The AS number where the destination resides.A configurable administrator tag.Protocol ID of the external protocol.The metric from the external protocol.Bit flags for default routing.Reference: http://www.cisco.com/c/en/us/support/docs/ip/enhanced-interior-gateway-routing-protocol-eigrp/13669-1.html#route_tagging
