**NEW QUESTION: 2**A company plans to implement an HTTP-based API to support a web app. The web app allows customers to check the status of their orders. The API must meet the following requirements:  
\* Implement Azure Functions  
\* Provide public read-only operations  
\* Do not allow write operations  
You need to recommend configuration options. What should you recommend? To answer, configure the appropriate options in the dialog box in the answer area.  
NOTE: Each correct selection is worth one point.**Answer:** Explanation: Explanation  
Allowed authentication methods: GET only  
Authorization level: Anonymous  
The option is Allow Anonymous requests. This option turns on authentication and authorization in App Service, but defers authorization decisions to your application code. For authenticated requests, App Service also passes along authentication information in the HTTP headers. This option provides more flexibility in handling anonymous requests.
