NEW QUESTION: 1You are creating a Web site for a customer. You will use an external linked style sheet for controlling the style of elements and giving a consistent look and feel to the site. Which of the following best describes this external style sheet?**A.** A text file that uses the .css file name extension and contains style definitions and HTML formatting tags**B.** A text file that uses the .css file name extension and contains only style definitions**C.** A text file that uses the .htm file name extension and contains only style definitions**D.** A text file that uses the .htm file name extension and contains style definitions and HTML formatting tags**Answer: B**

NEW QUESTION: 2What should you use to evaluate whether your company's Azure environment meets regulatory requirements?**A.** the Advisor blade from the Azure policy**B.** the Knowledge Center website**C.** the Security Center blade from the Azure portal**D.** Compliance Manager from the Security Trust Portal**Answer: C**Explanation:ExplanationThe Security Center

blade from the Azure portal includes the 'regulatory compliance dashboard'.The regulatory compliance dashboard provides insight into your compliance posture for a set of supported standards and regulations, based on continuous assessments of your Azure environment.In the Azure Security Center regulatory compliance blade, you can get an overview of key portions of your compliance posture with respect to a set of supported standards. Currently supported standards are Azure CIS, PCI DSS 3.2, ISO 27001, and SOC TSP.In the dashboard, you will find your overall compliance score, and the number of passing versus failing assessments with each standard. You can now focus your attention on the gaps in compliance for a standard or regulation that is important to you.References:
