B. A schedule for DCS1
C. A File Server Resource Manager (FSRM) quota on the %Systemdrive%\PerfLogs folder
D. A File Server Resource Manager (FSRM) file screen on the %Systemdrive%\PerfLogs folder
Answer: A
Explanation:

NEW QUESTION: 2How does indexing latency in xPlore affect repository searches?
A. Searching for objects based on object property values that were changed or removed is not possible until the Index Server re-indexes the object.
B. Searching can be performed immediately on an indexed object using changed or updated information.
C. Searching changed metadata is available for modified documents but changed content is only searchable after the content is re-indexed.
D. The Content Server must be restarted to detect indexing modifications.
Answer: A

NEW QUESTION: 3Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012. Server1 is the enterprise root certification authority (CA) for contoso.com. You need to enable CA role separation on Server1. Which tool should you use?
A. The Certutil command
B. The Certsrv command
C. The Certificates snap-in
D. The Authorization Manager console
Answer: A
Explanation:Explanation To enable role separation * Open Command Prompt. * Type: certutil -setreg caRoleSeparationEnabled 1 Etc. Reference: Enable role separation

NEW QUESTION: 4You have an answer file for a Windows 7 installation. You need to perform an unattended installation of Windows 7 by using the answer file. What should you do?
A. Name the answer file autounattend.xml and save it to a USB disk. Start the computer from the Windows 7

DVD.**B.** Name the answer file autounattend.ini and save it to a USB disk. Start the computer from the Windows 7 DVD.**C.** Name the answer file unattend.xml and save it to a USB disk. Start the computer from the Windows Preinstallation Environment (Windows PE).**D.** Name the answer file unattend.txt and save it to a USB disk. Start the computer from the Windows Preinstallation Environment (Windows PE).**Answer: A**Explanation:Explanation/Reference: 10350 2067 30205Unattended installationYou can perform an unattended installation of Windows 7 by using an installation file called Unattend.xml. These installation files store answers to the questions asked by the Setup Wizard. When the Windows 7 installation process starts, Windows checks for attached USB storage devices that have this file in their root directory. Unattended installations are suitable when you need to deploy Windows 7 to a large number of computers because you do not have to interact with them manually, responding to prompts, as the installation progresses.Building a Reference InstallationYou configure your reference computer with a customized installation of Windows 7 that you then duplicate onto one or more destination computers. You can create a reference installation by using the Windows product DVD and (optionally) the answer file you created in the previous section.
