There are no extra useless things to disturb your learning of the CRT-271 training questions, Latest questions and answers, Man proposes, god disposes, With the complete collection of questions and answers, Estruturit has assembled to take you through 728 Q&As to your CRT-271 Exam preparation.

However, like all the exams, Salesforce CRT-271 test is also very difficult.

NEW QUESTION: 1 A company wants to only review pages with low confidence and failed validation fields. High confidence and good validation will bypass review and continue directly to Export. What automatically configured action in the validate ruleset sets a flag for pages to be reviewed?
A. Use the action "Status_Preserve_OFF" from the runner library to automatically set the object status for viewing.
B. Use the action "CheckAllIntegrity" from the runner library to automatically set the status flag.
C. Use the action "SetProblemValue" from the autodoc library to set the threshold of problem status for viewing.
D. Set the action "SetIsOverridable" from the validations library to False to automatically set the object status for viewing.
Answer: A

NEW QUESTION: 2 The company network is in the process of migrating the IP address scheme to use IPv6. Which of the following address types are associated with IPv6? (Select three).
A. Public
B. Unicast
C. Multicast
D. Anycast
E. Private
F. Broadcast
Answer: B,C,D

NEW QUESTION: 3 Das Wasserfall-Lebenszyklusmodell der Softwareentwicklung wird am besten verwendet, wenn:
A. Das Projekt den Einsatz neuer Technologien beinhalten.
B. Das Projekt beabsichtigt, einen objektorientierten Entwurfs- und Programmieransatz anzuwenden.
C. Die Anforderungen werden gut verstanden und es wird erwartet, dass sie stabil bleiben, ebenso wie das Geschäftsumfeld, in dem das System betrieben wird.
D. Die Anforderungen sind gut verstanden und das Projekt unterliegt Zeitdruck.
Answer: C
Explanation: Erläuterung: In der Vergangenheit war das Wasserfallmodell am besten für die in der Auswahl beschriebenen stabilen Bedingungen geeignet. A. Wenn der Grad der Unsicherheit des zu liefernden Systems und die Bedingungen, unter denen es verwendet wird, ansteigen, war das Wasserfallmodell unter diesen Umständen nicht erfolgreich, und die verschiedenen Formen des iterativen Entwicklungslebenszyklus bieten den Vorteil von Aufschlüsselung des Umfangs des zu liefernden Gesamtsystems, wodurch das Sammeln von Anforderungen und die Entwurfsaktivitäten leichter handhabbar werden. Die Möglichkeit, funktionierende Software

früher zu liefern, verringert auch die Unsicherheit und kann eine frühere Realisierung von Vorteilen ermöglichen. Die Wahl eines Entwurfs- und Programmieransatzes ist selbst kein entscheidender Faktor für die Art des geeigneten Softwareentwicklungslebenszyklus. Der Einsatz neuer Technologien in einem Projekt birgt ein erhebliches Risiko. Eine iterative Form der Entwicklung, insbesondere eine der agilen Methoden, die sich auf die frühe Entwicklung von tatsächlich funktionierender Software konzentriert, ist wahrscheinlich die bessere Option, um diese Unsicherheit zu bewältigen.
