At the same time, you will have the chance to enjoy the 24-hours [FCP_FAZ_AN-7.4](#) online service if you purchase our products, so we can make sure that we will provide you with an attentive service.

NEW QUESTION: 1 A SysOps administrator is evaluating Amazon Route 53 DNS options to address concerns about high availability for an on-premises website. The website consists of two servers: a primary active server and a secondary passive server. Route 53 should route traffic to the primary server if the associated health check returns 2xx or 3xx HTTP codes. All other traffic should be directed to the secondary passive server. The failover record type, set ID, and routing policy have been set appropriately for both primary and secondary servers. Which next step should be taken to configure Route 53?
A. Create an A record for each server. Associate the records with the Route 53 TCP health check.
B. Create an alias record for each server with evaluate target health set to yes. Associate the records with the Route 53 TCP health check.
C. Create an alias record for each server with evaluate target health set to yes. Associate the records with the Route 53 HTTP health check.
D. Create an A record for each server. Associate the records with the Route 53 HTTP health check.
Answer: C

Answer: D
Explanation: Explanation/Reference: Explanation: SSL establishes a session using asymmetric encryption and maintains the session using symmetric encryption.

NEW QUESTION: 4 A solution architect has been tasked with designing a new environment for a company's growing needs, and has obtained this information:
- Uptime is critical during regular business hours when 95% of the transactions occur. Application uptime must be 99.9% during those hours.
- In a true Disaster, the business can withstand a day of data loss and half a day of downtime.
- The company is one year into a 5-year contract with the co-lo datacenter.
- The building that is currently occupied no longer has any floor space available, but the company

has 3 empty racks of space. The co-lo can provide up to 11KVA of power per rack.- There are current contacts with Dell to provide servers and withCisco to provide the network components.- The network team has standardized on an end-to-end 10Gb network.Based on this information, what are two requirements for the new design? (Choose two.)**A.** RTO of 24 hours.**B.** RTO of 12 hours.**C.** 11KVA of power is available per rack.**D.** The application must be available 99.9% during business hours.**Answer: B,D**Explanation:- Uptime is critical during regular business hours when 95% of the transactions occur. Application uptime must be 99.9% during those hours.- In a true Disaster, the business can withstand a day of data loss (24 H RPO) and half a day of downtime (12 H RTO).
