NEW QUESTION: 1Which of the following is BEST suited for secure communications within a small group?
A. Certification authority
B. Web of trust
C. Key distribution center
D. Kerberos Authentication System
Answer: B
Explanation:Explanation/Reference:Explanation:Web of trust is a key distribution method suitable for communication in a small group. It ensures pretty good privacy (PGP) and distributes the public keys of users within a group. Key distribution center is a distribution method suitable for internal communication for a large group within an institution, and it will distribute symmetric keys for each session. Certification authority is a trusted third party that ensures the authenticity of the owner of the certificate. This is necessary for large groups and formal communication. A Kerberos Authentication System extends the function of a key distribution center, by generating 'tickets' to define the facilities on networked machines which are accessible to each user.

NEW QUESTION: 2Your company is moving towards tracking web page users with a small tracking image loaded on each page. Currently you are serving this image out of US-East, but are starting to get concerned about the time it takes to load the image for users on the west coast. What are the two best ways to speed up serving this image? Choose 2 answers.
A. Use Route 53's Latency Based Routing and serve the image out of US-West-2 as well as US-East-1
B. Serve the image out through CloudFront
C. Serve the image out of S3 so that it isn't being served of your web application tier
