NEW QUESTION: 1You have an Exchange Server 2013 organization.You create a public folder. You assign an email address to the public folder.You need to ensure that only a user named User1 can add content to the public folder by using email.Which cmdlet should you run?**A.** Set-Mailbox**B.** Set-MailPublicFolder**C.** Add-PublicFolderCMentPermission**D.** Set-PublicFolder
Answer: A

NEW QUESTION: 2Why would you reduce the default disk_repair_time parameter?**A.** To extend the availability of your ASM disk groups.**B.** To increase performance of an Exadata Storage Server.**C.** To reduce the need for high redundancy**D.** To reduce the amount of data collected for a fast resynch**Answer: D****Explanation:**During transient disk failures within a failure group, ASM keeps track of the changed extents that need to be applied to the offline disk. Once the disk is available, only the changed extents are written to resynchronize the disk, rather than overwriting the contents of the entire disk. This can speed up the resynchronization process considerably.ASM drops disks if they remain offline for more than 3.6 hours. The disk groups default time limit is altered by changing the DISK_REPAIR_TIME parameter with a unit of minutes (M or m) or hours (H or h).
