Get all things done in a proper way and then you will get happy results in the exam for sure through these tools, I believe if you pay attention on our C-THR70-2404 actual test questions you can sail through the examinations surely.

Whether you are purchasing our C-THR70-2404 training questions, installing or using them, we won't give away your information to other platforms, and the whole transaction process will be open and transparent.

So do not rely on some third party blogs – most probably information there is old, the same applies to YouTube videos, To better understand our C-THR70-2404 preparation questions, you can also look at the details and the guarantee.

You can free download part of Estruturit's exercises and answers about SAP certification C-THR70-2404 exam as a try, then you will be more confident to choose our Estruturit's products to prepare your SAP certification C-THR70-2404 exam.

**NEW QUESTION: 1**You need to add code at line AM10 of the application manifest to ensure that the requirement for manually reviewing content can be met. How should you complete the code? To answer, select the appropriate options in the answer area. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: Explanation Box 1: sidSid: Session ID, used for per-session user sign-out. Personal and Azure AD accounts. Scenario: Manual review To review content, the user must authenticate to the website portion of the ContentAnalysisService using their Azure AD credentials. The website is built using React and all pages and API endpoints require authentication. In order to review content a user must be part of a ContentReviewer role. Box 2: email Scenario: All completed reviews must include the reviewer's email address for auditing purposes. Topic 3, City Power & Light Case study This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided. To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study. At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section. To start the case study To display the first question in this case study, click the button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to

answer a question, click the Background City Power & Light company provides electrical infrastructure monitoring solutions for homes and businesses. The company is migrating solutions to Azure. Current environment Architecture overview The company has a public website located at <http://www.cpandl.com/>. The site is a single-page web application that runs in Azure App Service on Linux. The website uses files stored in Azure Storage and cached in Azure Content Delivery Network (CDN) to serve static content. API Management and Azure Function App functions are used to process and store data in Azure Database for PostgreSQL. API Management is used to broker communications to the Azure Function app functions for Logic app integration. Logic apps are used to orchestrate the data processing while Service Bus and Event Grid handle messaging and events. The solution uses Application Insights, Azure Monitor, and Azure Key Vault. Architecture diagram The company has several applications and services that support their business. The company plans to implement serverless computing where possible. The overall architecture is shown below. User authentication The following steps detail the user authentication process:

- \* The user selects Sign in in the website.
- \* The browser redirects the user to the Azure Active Directory (Azure AD) sign in page.
- \* The user signs in.
- \* Azure AD redirects the user's session back to the web application. The URL includes an access token.
- \* The web application calls an API and includes the access token in the authentication header. The application ID is sent as the audience ('aud') claim in the access token.
- \* The back-end API validates the access token.

Requirements Corporate website

- \* Communications and content must be secured by using SSL.
- \* Communications must use HTTPS.
- \* Data must be replicated to a secondary region and three availability zones.
- \* Data storage costs must be minimized.

Azure Database for PostgreSQL The database connection string is stored in Azure Key Vault with the following attributes:

- \* Azure Key Vault name: cpandlkeyvault
- \* Secret name: PostgreSQLConn
- \* Id: 80df3e46ffcd4f1cb187f79905e9a1e8

The connection information is updated frequently. The application must always use the latest information to connect to the database. Azure Service Bus and Azure Event Grid

- \* Azure Event Grid must use Azure Service Bus for queue-based load leveling.
- \* Events in Azure Event Grid must be routed directly to Service Bus queues for use in buffering.
- \* Events from Azure Service Bus and other Azure services must continue to be routed to Azure Event Grid for processing.

Security

- \* All SSL certificates and credentials must be stored in Azure Key Vault.
- \* File access must restrict access by IP, protocol, and Azure AD rights.
- \* All user accounts and processes must receive only those privileges which are essential to perform their intended function.

Compliance Auditing of the file updates and transfers must be enabled to comply with General Data Protection Regulation (GDPR). The file updates must be read-only, stored in the order in which they occurred, include only create, update, delete, and copy operations, and be retained for compliance reasons. Issues Corporate website While testing the site, the following error message displays: CryptographicException: The system cannot find the file specified. Function app You perform local testing for the RequestUserApproval function. The following error message displays: 'Timeout value of 00:10:00 exceeded by function: RequestUserApproval' The same error message displays when you test the function in an Azure development environment when you run the following Kusto query: FunctionAppLogs | where FunctionName == "RequestUserApproval" Logic app You test the Logic app in a development environment. The following error message displays: '400 Bad Request' Troubleshooting of the error shows an HttpTrigger action to call the RequestUserApproval function. Code Corporate website Security.cs: Function app RequestUserApproval.cs:

**NEW QUESTION: 2** The implementations group has been using the test bed to do a 'proof-of-concept' that requires both Client 1 and Client 2 to access the WEB Server at 209.65.200.241. After several changes to the network addressing, routing scheme, DHCP services, NTP services, and FHRP services, a trouble ticket has been operated indicating that Client 1 cannot ping the 209.65.200.241 address. Use the supported commands to Isolated the cause of this fault and answer the following questions. On which device is the fault condition located? **A. R2 B. R3 C. DSW2 D. ASW2 E. R4 F. R1 G. ASW1 H. DSW1** **Answer: G** Explanation: Since the

Clients are getting an APIPA we know that DHCP is not working. However, upon closer examination of the ASW1 configuration we can see that the problem is not with DHCP, but the fact that the trunks on the port channels are only allowing VLANs 1-9, when the clients belong to VLAN 10. VLAN 10 is not traversing the trunk on ASW1, so the problem is with the trunk configuration on ASW1.

**NEW QUESTION: 3** Which of the following businesses would benefit most from an expansionary monetary policy? **A.** Low geared companies whose inputs are mainly imported. **B.** Companies with high levels of borrowing producing consumer durables. **C.** Cash rich companies producing consumer durable goods. **D.** Companies with low levels of borrowing in the supermarket industry. **Answer: B**
