NEW QUESTION: 1 Which of the following is the difference between local and network applications?
A. A network application is loaded in a remote computer, whereas a local application is loaded in a local computer.
B. A network application is loaded in a local computer, whereas a local application is loaded in an administrative computer.
C. A local application is loaded in a local computer and accessed from a remote computer, whereas a network application is loaded in a local computer and accessed only by the local computer.
D. A network application is loaded in a local computer and accessed from a remote computer, whereas a local application is loaded in a local computer and accessed only by the local computer.
Answer: D
Explanation: The difference between local and network applications is that a network application is loaded in a local computer and accessed from a remote computer, whereas a local application is loaded in a local computer and accessed only by the local computer. answer A, C, and D are incorrect. These are invalid answer options.

NEW QUESTION: 2 A new project is being planned and the project manager learns of a group that is concerned with potential impacts on the area To ensure that these concerns are addressed what should the project manager do first?
A. Evaluate the stakeholders' influence
B. Identify the stakeholders.
C. Perform a risk analysis
D. Use expert judgment
Answer: C

NEW QUESTION: 3 If a supply management professional were developing a forecast. What two sets of information are the basis for their creation?
A. Planned and orchestrated
B. Deterministic and probabilistic
C. Determined and planned
D. Future and current
Answer: B
Explanation: If a supply management professional were developing a forecast. The two sets of information their information is based on are deterministic (known) and probabilistic (unknown). Determined and planned, Planned and orchestrated, as well as future and current are not information set types.
