Credit Card will safeguarded buyers' benefits **New PCNSA Test Review** and restrain sellers' behavior, The hit rate of the materials is 99.9%.

NEW QUESTION: 1 Which of the following is a requirement when implementing PKI if data loss is unacceptable?
A. Non-repudiation
B. Certificate revocation list
C. Key escrow
D. Web of trust
Answer: C
Explanation: Key escrow is a database of stored keys that later can be retrieved. Key escrow addresses the possibility that a third party may need to access keys. Under the conditions of key escrow, the keys needed to encrypt/decrypt data are held in an escrow account (think of the term as it relates to home mortgages) and made available if that third party requests them. The third party in question is generally the government, but it could also be an employer if an employee's private messages have been called into question.

NEW QUESTION: 2 **A.** Option C
B. Option D
C. Option A
D. Option B
Answer: D

NEW QUESTION: 3 Which statement about implementing the Cisco IPv6 provider Edge Router over MPLS is true?
A. 6PE feature is not supported over tunnels other than RSVP-TE tunnels.
B. Core MPLS routers are supporting IPv6 only.
C. 6PE feature is supported over tunnels other than RSVP-TE tunnels.
D. Core MPLS routers are supporting IPv4 only.
Answer: A
Explanation: Reference: http://www.cisco.com/en/US/docs/ios/ipv6/configuration/guide/ip6-over_mpls.pdf
The following restrictions apply when implementing the IPv6 Provider Edge Router over MPLS (6PE) feature: Core MPLS routers are supporting MPLS and IPv4 only, so they cannot forward or create any IPv6 Internet Control Message Protocol (ICMP) messages. Load balancing ability is not provided by Cisco 6PE between an MPLS path and an IPv6 path. If both are available, the MPLS path is always preferred. Load balancing between two MPLS paths is possible. BGP multipath is not supported for Cisco 6PE routes. If two BGP peers advertise the same prefix with an equal cost, Cisco 6PE will use the last route to cross the MPLS core. 6PE feature is not supported over tunnels other than RSVP-TE tunnels.

NEW QUESTION: 4 Which key must Fabrikam use during the installation of Office 2007?
A. Volume License Key 1.0 (VLK 1.0)
B. Key Management Service (KMS)
C. Retail Product Key
D. Multiple Activation Key (MAK)
Answer: A
Explanation: Microsoft 70-671 : Practice Test
