We use the most trusted third part vendor as our card processor, [220-1102 Exam Prep](#) all the information are guaranteed by Credit Card Professor Global Collect, Moneybookers and Paypal.

NEW QUESTION: 1Your network contains an Active Directory domain named contoso.com. The domain contains a server named Server1 that runs Windows Server 2012 R2 and has the Web Server (IIS) server role installed. Server1 has a web site named Web1. Web1 is configured to use digest authentication. You need to ensure that a user named User1 can access Web1. What should you do from Active Directory Users and Computers?
A. From the properties of User1, select Use Kerberos DES encryption types for this account.
B. From the properties of User1, select Store password using reversible encryption.
C. From the properties of Server1, select Trust this computer for delegation to any service (Kerberos only).
D. From the properties of Server1, assign the Allowed to Authenticate permission to User1.
Answer: B
Explanation: Challenge Handshake Authentication Protocol (CHAP) is a basic level of iSCSI security that is used to authenticate the peer of a connection and is based upon the peers sharing a secret: that secret being a password. To make sure that User1 can connect to the server, you should use Active Directory Users and Computers to store that password.

NEW QUESTION: 2In supplier qualification management, you have set up overall supplier response ranking, including Display overall rank to suppliers. However for some suppliers, you are not seeing any overall rank being displayed. What is the reason? (Choose the best answer.)
A. Overall rank is only calculated for those suppliers on the approved supplier list.
B. Overall rank is not calculated for responses with partial lines or quantities.
C. Overall rank is not calculated when there are no internal cost factors.
D. Overall rank is not calculated for suppliers with expired supplier qualification assessments.
E. Overall rank is only calculated for spend authorized supplier responses.
Answer: B

NEW QUESTION: 3Your company uses Microsoft Teams. You are planning the compliance strategy for Microsoft Teams. All compliance tasks must be performed by a user in the

compliance department who will be assigned the Global admin role and will not be a team owner. You need to identify which tools to use for the following tasks: *Archive a team.* *Restore a deleted team.* *Permanently delete a team.* Which tool should you identify for each task? To answer, drag the appropriate tools to the correct tasks. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point. **Answer:** Explanation:

NEW QUESTION: 4 You create an application by using Microsoft Visual Studio .NET 2008 and the .NET Framework 3.5. The application exposes a Windows Communication Foundation (WCF) service that will be consumed by an ASP. NET application. The WCF application and the ASP.NET application will be deployed on the same server. You need to ensure that the WCF service meets the following requirements: The communication between the applications incurs minimum latency. The binding satisfies the ordered delivery constraint that is specified in the service implementation by using the DeliveryRequirements attribute. Which binding object should you use? **A.** NetTcpBinding **B.** WSHttpBinding **C.** NetPeerTcpBinding **D.** NetNamedPipeBinding **Answer: D**
