NEW QUESTION: 1You plan to deploy a Forefront Identity Manager (FIM) 2010 server from the test environment to the production environment. You perform the following steps: Install FIM on a new server in the production environment. Enable maintenance mode in the production environment. Run the ExportSchema.ps1 Windows PowerShell script in the test environment and rename schema.xml to pilot_schema.xml. Run the ExportPolicy.ps1 Windows PowerShell script in the test environment and rename policy.xml to pilot_policy.xml. You need to complete the migration of the FIM Service schema and synchronization configuration from the test environment to the production environment. What should you do? (Choose all that apply.)**A.** Run the SyncSchema.ps1 and CommitChanges.ps1 PowerShell scripts in the test environment.**B.** Run the SyncSchema.ps1 and CommitChanges.ps1 PowerShell scripts in the production environment.**C.** Run the ExportSchema.ps1 PowerShell script in the production environment.**D.** Import the Server Configuration for the Synchronization Service in the production environment.**E.** Rename schema.xml to production_schema.xml.**Answer: B,C,E** Explanation: In exam order will be asked (C BEFORE A)(A BEFORE E)(E BEFORE B)

NEW QUESTION: 2A web application for business expense reporting allows uploading expense receipts. Multiple receipts can be uploaded single step using one HTTP request. The servlet that processes the request has been marked with the @MultipartConfig annotation. Which method should the servlet use to access the uploaded files?**A.** HttpServletRequest.getData()**B.** servletRequest.getAllParts()**C.** servletRequest.getParts()**D.** HttpServletRequest.getParts()**Answer: D** Explanation: The request.getParts() method returns collections of all Part objects. If you have more than one input of type file, multiple Part objects are returned. Since Part objects are named, the getPart(String name) method can be used to access a particular Part. Alternatively, the getParts() method, which returns an Iterable<Part>, can be used to get an Iterator over all the Part objects.

NEW QUESTION: 3DRAG DROP You are using Microsoft Test Manager (MTM) to manage your testing efforts. You want to see which work items have changed since the last time you assigned a build to the test plan. You need to assign a new build to the test plan and create a list of the bugs that have been fixed and the features that have been associated with the new build. What should you do? (To answer, move the three appropriate actions from the list of actions to the answer area and arrange them in the correct order.) Select and Place:**Answer:** Explanation: Explanation/Reference: Note: * To determine changes between builds and use a new build for testing Open Microsoft Test Manager. 1. To check changes between builds, choose the down-arrow on the center group selector and then choose Testing Center. 2. In the center group menu bar, choose Track. 3. Choose Assign Build. 4. The Assign Build activity is displayed and the

available builds are shown based on your build filter.5. (Optional) To display the work items for a different build, click Available builds and select a different build.The work items are displayed in Associated items.6. To use a new build for your testing for this test plan, choose Available builds and select a build and then choose Assign to plan.* After you select the build for your test plan that you are currently using, you can select a different build to see which work items have been associated with any builds between the test plan build and this selected build. Microsoft Test Manager displays the work items that have been associated with changesets checked in between any two builds, as shown in the following illustration. You can sort these work items by associated build or by the state of the work item.

NEW QUESTION: 4Which of the following is MOST relevant for an information security manager to communicate to IT operations?**A.** The level of inherent risk**B.** The level of exposure**C.** Vulnerability assessments**D.** Threat assessments**Answer: C**
