Please rest assured that your worry is unnecessary.

**NEW QUESTION: 1**You need to configure security for the SSRS instance on SSRS01 to connect to SSAS and minimize downtime.What should you do? (Each correct answer presents part of the solution. Choose all that apply.)**A.** Restart the IIS service.**B.** Configure SSRS01 to use the Custom authentication type.**C.** Register a service principal name for the Analysis Services service.**D.** Configure SSRS01 to use the Negotiate authentication type.**E.** Register a service principal name for the Report Server service.**Answer: D,E**Explanation:A (not B): If you are deploying Reporting Services in a network that uses the Kerberos protocol for mutual authentication, you must create a Service Principal Name (SPN) for the Report Server service if you configure it to run as a domain user account.D (not E):\*See step 6 below.

\*RSWindowsNegotiate. If you initially set the Windows service account for the report server to NetworkService or LocalSystem in Reporting Services Configuration Manager, RSWindowsNegotiate is added to the RSReportServer.config file as the default setting. With this setting, the report server can accept requests from client applications requesting Kerberos or NTLM authentication. If Kerberos is requested and the authentication fails, the report server switches to NTLM authentication and prompts the user for credentials unless the network is

configured to manage authentication transparently. To register an SPN for a Report Server service running as a domain user Using RSWindowsNegotiate is your best option because it provides the greatest flexibility for multiple clients in an intranet environment. Not C: IIS is not mention in this scenario. Note: \* From scenario: / A single-server deployment of SQL Server 2008 R2 Reporting Services (SSRS) in nativemode is installed on a server named SSRS01. The Reporting Server service is configured to use a domain service account. Reference: Register a Service Principal Name (SPN) for a Report Server

### NEW QUESTION: 2

開発者は、RESTAPIを介して連絡先をプログラムでジャーニーに挿入したいと考えています。POSTデータ拡張フィールドと値を使用する推奨ルートは何ですか？**A.** / Interaction / v1 / eventDefinitions**B.** / contacts / v1 / contactEvents**C.** / interaction / v1 / interactions**D.** / Interaction / v1 / events**Answer: D**

**NEW QUESTION: 3** When implementing source-based remote-triggered black hole filtering, which two configurations are required on the edge routers that are not the signaling router? (Choose two.)**A.** Redistribution into BGP of the static route that points to the IP address of the attacker**B.** A route policy to set the redistributed static routes with the no-export BGP community**C.** uRPF on all external facing interfaces at the edge routers**D.** A static route pointing to the IP address of the attacker**E.** A static route to a prefix that is not used in the network with a next hop set to the Null0 interface**Answer: C, E**  
Explanation: Section: (none)  
Explanation/Reference: Explanation:

**NEW QUESTION: 4** **A.** Option D **B.** Option C **C.** Option B **D.** Option A **Answer: B**
