You may find that there are always the latest information in our HPE2-W09 practice engine and the content is very accurate.

**NEW QUESTION: 1A.** USB Pen drive**B.** Hard disk drive**C.** SD card**D.** CD-ROM**Answer: A,C,D**

Explanation:CD-ROM, SD card, USB Pen drive, floppy disk, etc., are removable storage media. CD-ROM (Compact Disc Read-Only Memory) is a type of removable storage optical media. It can store up to 1GB of data, although most common CD-ROMs store 700MB of data. It comes in a standard size and format, so users can load any type of CD-ROM into any CD drive or CD-ROM player. Once data is written to a CD-ROM, it cannot be erased or changed. SD card is a removable storage device. Secure Digital (SD) card is a non-volatile memory card format used in portable devices such as mobile phones, digital cameras, and handheld computers. SD cards are based on the older MultiMediaCard (MMC) format, but they are a little thicker than MMC cards. Generally an SD card offers a write-protect switch on its side. SD cards generally measure 32 mm x 24 mm x 2.1 mm, but they can be as thin as 1.4 mm. The devices that have SD card slots can use the thinner MMC cards, but the standard SD cards will not fit into the thinner MMC slots. Some SD cards are also available with a USB connector. SD card readers allow SD cards to be accessed via many connectivity ports such as USB, FireWire, and the common parallel port. USB Pen drive is a removable storage device. A pen drive is also known as a USB flash drive. It is a small device used to transfer data from one computer to another through USB ports. Pen drives are available in various capacities. When a pen drive is plugged into the USB port, Windows Explorer shows it as a removable drive. Answer option C is incorrect. The hard disk drive is not a removable storage media. It is installed inside the computer case. It can store large amounts of data and provides fast read/write performance. HDD can be connected to a computer with the Integrated Device Electronics (IDE), Small Computer System Interface (SCSI), and SATA interface. It consists of inflexible platters coated with material in which data is recorded magnetically with read/write heads. Note: Only external hard disk drives are removable devices.

**NEW QUESTION: 2**

テリトリーの管理権限によって付与されるのは次のうちどれですか（該当するものをすべて選択してください）。**A.** アカウント割り当てルールを作成および編集する**B.**

テリトリーにアカウントを手動で割り当てます**C.** 組織全体のテリトリー管理設定を構成します**D.**

テリトリーを作成および編集します**E.** 予測の作成と編集**F.**

テリトリーにユーザーを追加および削除します**Answer: A,B,C,D,F**

**NEW QUESTION: 3** You need to meet the connection requirements for the New York office. What should you do? To answer, select the appropriate options in the answer area. **NOTE:** Each correct selection is worth one point. **Answer:** Explanation: Explanation: **Box 1:** Create a virtual network gateway and a local network gateway. Azure VPN gateway. The VPN gateway service enables you to connect the VNet to the on-premises network through a VPN appliance. For more information, see [Connect an on-premises network to a Microsoft Azure virtual network](#). The VPN gateway includes the following elements: \* Virtual network gateway. A resource that provides a virtual VPN appliance for the VNet. It is responsible for routing traffic from the on-premises network to the VNet. \* Local network gateway. An abstraction of the on-premises VPN appliance. Network traffic from the cloud application to the on-premises network is routed through this gateway. \* Connection. The connection has properties that specify the connection type (IPSec) and the key shared with the on-premises VPN appliance to encrypt traffic. \* Gateway subnet. The virtual network gateway is held in its own subnet, which is subject to various requirements, described in the Recommendations section below. **Box 2:** Configure a site-to-site VPN connection On premises create a site-to-site connection for the virtual network gateway and the local network gateway. **Scenario:** Connect the New York office to VNet1 over the Internet by using an encrypted connection. **Incorrect Answers:** Azure ExpressRoute: Established between your network and Azure, through an ExpressRoute partner. This connection is private. Traffic does not go over the internet. **References:** <https://docs.microsoft.com/en-us/azure/architecture/reference-architectures/hybrid-networking/vpn>

**NEW QUESTION: 4** Joe, a security analyst, is attempting to determine if a new server meets the security requirements of his organization. As a step in this process, he attempts to identify a lack of security controls and to identify common misconfigurations on the server. Which of the following is Joe attempting to complete? **A.** Vulnerability scanning **B.** Penetration testing **C.** Black hat testing **D.** Black box testing **Answer: A**
