With Final SnapshotWithout Final SnapshotRetain Automated BackupsHow to chooseTo be able to restore your deleted DB instance at a later time, create a final DB snapshot.To delete a DB instance quickly, you can skip creating a final DB snapshot.
ImportantIf you skip the snapshot, to restore your DB instance you need one of the following:
* You have to use an earlier manual snapshot of the DB instance to restore the DB instance to that snapshot's point in time.
* You have to choose to retain automated backups; you can use those to restore it to any point in time* within your retention period.
Instead of creating a snapshot, you can choose to enable Retain automated backups when you delete a DB instance. These backups are still subject to the retention period of the DB instance and age out the same way systems snapshots do.
