NEW QUESTION: 1Who is responsible for initiating corrective measures and capabilities used when there are security violations?**A.** Data owners**B.** Information systems auditor**C.** Security administrator**D.** Management**Answer: D****Explanation:**Explanation/Reference:Explanation: Management is responsible for initiating corrective measures and capabilities used when there are security violations.**Incorrect Answers:**A: The Information systems auditor ensures that the correct controls are in place and are being maintained securely. The information systems auditor is not responsible for initiating corrective measures and capabilities used when there are security violations.**B:** The security administrator is responsible for implementing and maintaining specific security network devices and software in the enterprise. These controls commonly include firewalls, IDS, IPS, antimalware, security proxies, data loss prevention, etc. The security administrator is not responsible for initiating corrective measures and capabilities used when there are security violations.**D:** The data owner decides upon the classification of the data she is responsible for. The data owner is also responsible for ensuring that the necessary security controls are in place, defining security requirements per classification and backup requirements, approving any disclosure activities, ensuring that proper access rights are being used, and defining user access criteria. The data owner is not responsible for initiating corrective measures and capabilities used when there are security violations.
