NEW QUESTION: 1 A company deploys an Office 365 tenant. You must provide an administrator with the ability to manage company information detail in Office 365. You need to assign permissions to the administrator by following the principle of least privilege. Which role should you assign?
A. Global administrator
B. Service administrator
C. Billing administrator
D. User management administrator
Answer: A
Explanation: Explanation/Reference: Explanation: Global admin: Has access to all administrative features. Global admins are the only admins who can assign other admin roles. You can have more than one global admin in your organization. The person who signs up to purchase Office 365 becomes a global admin. Only the global administrator role will allow you to manage company information by means of editing the organization profile. None of the other roles are enabled to manage organization information.
