It means that you will have the chance to keep **New C1000-132 Braindumps Sheet** your information the latest, So every client is important for us, 24/7 after sale service for you, So do not hesitate and buy our C1000-132 Dumps Book study guide, we believe you will find surprise from our products.

There are three versions of IBM C1000-132 practice test materials for choosing.

NEW QUESTION: 1 MySecureData 회사는 전세계에 5 개의 지점을 가지고 있습니다. 웹 서버가 AWS에 있고 각 지점이 로컬 데이터 센터에 자체 데이터베이스를 갖도록 데이터 센터를 확장하려고합니다. 회사는 사용자 로그인을 기반으로 데이터 센터에 연결하려고 합니다. MySecureData 회사는 어떻게 AWS VPC로 이 시나리오를 구현할 수 있습니까?**A.** AWS CloudGateway를 사용하여 여러 VPN 연결과 통신하십시오.**B.** AWS VPN CloudHub를 사용하여 여러 VPN 연결과 통신하십시오.**C.** 단일 VPC에서 다른 데이터 센터를 연결할 수 없습니다.**D.** 앱 서버의 퍼블릭 서브넷이있는 5 개의 VPC를 생성하고 각 VPN의 VPN 게이트웨이를 설정하여 개별적으로 연결하십시오.**Answer: B****Explanation:** A Virtual Private Cloud (VPC) is a virtual network dedicated to the user's AWS account. The user can create subnets as per the requirement within a VPC. If the user wants to connect VPC from his own data centre, he can setup a public and VPN only subnet which uses hardware VPN access to connect with his data centre. If the organization has multiple VPN connections, he can provide secure communication between sites using the AWS VPN CloudHub. The VPN CloudHub operates on a simple hub-and-spoke model that the user can use with or without a VPC. This design is suitable for customers with multiple branch offices and existing internet connections who would like to implement a convenient, potentially low-cost hub-and-spoke model for primary or backup connectivity between remote offices.

NEW QUESTION: 2 The marketing team at universal containers wants to send an email to each lead received from its website. The country of the incoming lead should determine the language of the email that will be sent to the lead. How can the system administrator automate this process?**A.** Create a single email template and use the translation workbench to translate and send the appropriate template**B.** Create an email template for each language and a workflow alert to send appropriate template**C.** Create an email template for each language and an assignment rule to send appropriate template**D.** Create an email template for each language and an auto response rule to send appropriate template**Answer: A**

NEW QUESTION: 3 Which multicast address is reserved for cisco-rp-announce?**A.** 224.0.1.40**B.** 224.0.1.38**C.** 224.0.331.37**D.** 224.0.1.39**Answer: D****Explanation:** Auto-RP is a mechanism to automate distribution of RP information in a multicast network. The Auto-RP mechanism operates using two basic components, the candidate RPs and the RP mapping agents. Candidate RPs advertise their willingness to be an RP via "RP-announcement" messages. These messages are periodically sent to a reserved well-known group 224.0.1.39 (CISCO-RPANNOUNCE). RP mapping agents join group 224.0.1.39 and map the RPs to the associated groups. The RP mapping agents advertise the authoritative RP-mappings to another well-known group address 224.0.1.40 (CISCO-RP-DISCOVERY). All PIM routers join 224.0.1.40 and store the RP-mappings in their private cache. Reference: http://www.cisco.com/en/US/prod/collateral/iosswrel/ps6537/ps6552/whitepaper_c11508498.
