printable version Hide Answer If you experience [Sample SAFe-SASM Questions Answers](#) a problem while activating an exam, you can try the following solutions to resolve it.

NEW QUESTION: 1 To assist an organization in planning for IT investments, an IS auditor should recommend the use of:
A. an object-oriented architecture.
B. tactical planning.
C. enterprise architecture (EA).
D. project management tools.
Answer: C
Explanation: Explanation/Reference: Explanation: Enterprise architecture (EA) involves documenting the organization's IT assets and processes in a structured manner to facilitate understanding, management and planning for IT investments. It involves both a current state and a representation of an optimized future state. In attempting to complete an EA, organizations can address the problem either from a technology perspective or a business process perspective. Project management does not consider IT investment aspects; it is a tool to aid in delivering projects. Object-oriented architecture is a software development methodology and does not assist in planning for IT investment, while tactical planning is relevant only after high-level IT investment decisions have been made.

NEW QUESTION: 2 A. Option B B. Option D C. Option C D. Option A
Answer: A
Explanation: Proposal Generation The key benefits gained by performing this activity are: Development of the high-level Project Charter and Project Plan. The documentation of conclusions and implementation proposal content. The documentation of scope delimitations and risk assessments. Ref: http://bcinc.net/js/MSS20_ENUS_INT_02.pdf

NEW QUESTION: 3 While troubleshooting, a technician notices that some clients using FTP still work and that pings to the local router and servers are working. The technician tries to ping all known nodes on the network and they reply positively, except for one of the servers. The technician notices that ping works only when the hostname is used but not when FQDN is used. Which of the following servers is MOST likely down?
A. DNS server
B. DHCP server
C. Domain controller
D. WINS server
Answer: A
