NEW QUESTION: 1

監査人が、許可されていないユーザーからのアクセス試行を誤って受け入れる可能性があるアクセス制御システムを特定しました。

次の認証システムのうちどれが監査人による審査を受けましたか？ **A. 証明書ベース**

B. パスワードベース **C. ロケーションベース** **D. バイオメトリックベース** **Answer: D**

NEW QUESTION: 2 You have a server named Server1 that runs Windows Server 2012. You connect three new hard disks to Server1. You need to create a storage space that contains the three disks. The solution must meet the following requirements: * Provide fault tolerance if a single disk fails. * Maximize the amount of files that can be stored in the storage space. What should you create? **A. A mirrored space** **B. A parity space** **C. A simple space** **D. A spanned volume**

Answer: B Explanation: A. Stripes data across a set of pool disks, and is not resilient to any disk failures. B. A spanned volume is a dynamic volume consisting of disk space on more than one physical disk and not fault tolerant C. Fault tolerant but Not max space D. Fault tolerant and better space ratio

<http://social.technet.microsoft.com/wiki/contents/articles/15198.storage-spaces-overview.aspx>

NEW QUESTION: 3 Your network contains an Active Directory domain named contoso.com. Your company plans to open a branch office. The branch office will have 10 client computers

that run Windows 8 and at least one server that runs Windows Server 2012. The server will host BranchCache files and manage print queues for the network print devices in the branch office. You need to recommend a solution to ensure that the users in the branch office can print if the branch office server fails. What should you recommend? More than one answer choice may achieve the goal. Select the BEST answer. **A.** A print server cluster **B.** Branch Office Direct Printing **C.** A secure Web Services on Devices (WSD) printer **D.** Printer pooling **E.** A standby print server **Answer: B** Explanation: Branch Office Direct Printing can reduce Wide Area Network (WAN) usage by printing directly to a print device instead of a server print queue. This feature can be enabled or disabled on a per printer basis and is transparent to the user. This feature requires a print server running Windows Server 2012 and clients running Windows 8. It is enabled by an administrator using the Print Management Console or Windows PowerShell on the server.
