**NEW QUESTION: 1**The safest mode for a database to run is:**A. SAFE ModeB. ARCHIVELOG Mode C. NONARCHIVE ModeD. ARCHIVE ModeAnswer: B**

**NEW QUESTION: 2**For inbound calls that use SIP gateways to cisco unified communications manager, which two options are available when configuring the format for the calling number type? (Choose two)**A. Long DistanceB. DefaultC. SubscriberD. SIPE. UnknownAnswer: C,E**  
Explanation:For the final presentation of the calling party number, you can configure calling party transformation patterns for each calling party number type (National, International, Subscriber, and Unknown), and apply strip digits and prefix instructions specific to the calling party number type for that call. This allows Cisco Unified Communications Manager to reformat the calling party number such that the calling party number that displays on the called phone is a localized number that does not include unnecessary country codes and international access codes.
