NEW QUESTION: 1An engineer is designing an infrastructure to use a 40 Gigabit link as the primary uplink and a 10 Gigabit uplink as the alternate path. Which routing protocol allows for unequal cost load balancing?**A. IS-IS****B. RIP****C. OSPF****D. BGP****E. EIGRP****Answer: E**

NEW QUESTION: 2Which two actions will occur when a back-end server that is registered with a backend set is marked to drain connections? (Choose two.)**A. It immediately closes all existing connections to that instance.****B. It forcibly closes all connections to that instance after a timeout period.****C. It disallows new connections to that backend server.****D. It redirects the requests to a user-defined error page.****E. It keeps the connections to that instance open and attempts to complete any in-flight requests.****Answer: A,C**

NEW QUESTION: 3**DRAG DROP****Answer:** Explanation:Topic 2, Fourth CoffeeBackgroundYou are a developer working for Fourth Coffee, a company that sells coffee and coffee accessories through an Azure-based website and retail locations. Features of the website include the ability to write product reviews, comment on reviews and find whether a particular product is available at a specific retail location.Fourth Coffee licenses a product from Contoso, Ltd, that provides an Azure-based website for users in Japan. The website includes reviews and comments. All comments and product reviews are shared between Fourth Coffee's website and the Japanese website.Business RequirementsProduct ReviewsUser-submitted product reviews are provided by Contoso and are stored in the Japanese language in an HTML file format. When a review is submitted, you must remove specific keywords from the review and translate the review to the English language before you load the review onto the Fourth Coffee website. Translation processing and migration must occur with a minimum delay.Product reviews can be loaded by third party websites, but only after they are processed and reviewed by Fourth Coffee employees. Reviews can be loaded up to one year after they are made public on the Fourth Coffee website.CommentsUsers can post comments about product reviews. After a comment is posted, all other users who comment on that product receive a notification on their Android or Windows Phone device.Technical RequirementsProduct ReviewsThe product reviews from Contoso are stored as HTML files in BLOB storage with the format "/reviews/<guid>html".Fourth Coffee stores reviews in BLOB storage, with the format "/users/reviews/<guid>.md" where<guid> matches the file name of the review. After a Fourth Coffee employee approves the review, a metadata property named Reviewed with the value true is set on the BLOB.Some product reviews contain language-specific terms that require additional processing. The additional processing is done by a python script named cleanup.py.

The script relies on a data file named `term.data` that contains terms and their replacement values. All running instances of the script must use the same instance of the data file. To simplify the security configuration, Contoso and Fourth Coffee agree to configure the website and services to allow for communication between the services without the traffic being visible on the public Internet. To prevent third parties from harvesting review data, whenever the system returns public reviews, it records the IP address of the request and increments a count of the times that data is retrieved from a particular IP address. If an IP address makes more than 10 requests a minute, the client must be redirected to a static page named `ratelimit.html`. The Fourth Coffee website and related services that run on Azure are located in the US West region and are on a single virtual network named `Main` with the address `10.1.0.0/16`. The Contoso website and related services that run on Azure are located in the Japan West region and are on a single virtual network named `CT` with the address `10.2.0.0/24`. Product review comments must be processed, at most, one time. When a comment is posted, it must be associated with the identity of the user who posted the comment. Product review comments are indexed by a web service that accepts the body of the comment in an HTTP POST. When comments are posted, they must be indexed for search within 15 minutes. Each comment must be indexed exactly once. All mobile device notifications are sent by using the Azure Notification Hub service. Relevant portions of the `CommentIndexer.cs` file are shown below. Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which the code belongs. Relevant portions of the `ReviewController.cs` file are shown below. Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which the code belongs. Relevant portions of the `TranslateJob.cs` file are shown below. Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which the code belongs. Relevant portions of the `AccessRateFilter.cs` file are shown below. Line numbers are included for reference only and include a two-character prefix that denotes the specific file to which the code belongs.

NEW QUESTION: 4 Which of the following is NOT true about setting the "permission" attribute to tags?
A. The permission can only be included in application or manifest tags.
B. Only one permission can be added to any tag.
C. The permission in the component overrides the permission in the application tag.
D. If permission is required by all components of the application then it should be specified in application tag.
Answer: A
