NEW QUESTION: 1Your network environment includes remote employees.You need to create a secure connection for the remote employees who require access to your Azure virtual network. What should you do?**A.** Configure a site-to-site VPN.**B.** Configure an ExpressRoute.**C.** Deploy Windows Server 2012 RRAS.**D.** Configure a point-to-site VPN.**Answer: C**

NEW QUESTION: 2A media storage application uploads user photos to Amazon S3 for processing. End users are reporting that some uploaded photos are not being processed properly. The Application Developers trace the logs and find that AWS Lambda is experiencing execution issues when thousands of users are on the system simultaneously. Issues are caused by:Limits around concurrent executions.The performance of Amazon DynamoDB when saving data.Which actions can be taken to increase the performance and reliability of the application? (Choose two.)**A.** Use S3 Transfer Acceleration to provide lower-latency access to end users.**B.** Evaluate and adjust the read capacity units (RCUs) for the DynamoDB tables.**C.** Configure a dead letter queue that will reprocess failed or timed-out Lambda functions.**D.** Add an Amazon ElastiCache layer to increase the performance of Lambda functions.**E.** Evaluate and adjust the write capacity units (WCUs) for the DynamoDB tables.**Answer: C,E**Explanation:ExplanationB: <https://docs.aws.amazon.com/amazondynamodb/latest/developerguide/HowItWorks.ReadWriteCapacityMode.html> D: <https://aws.amazon.com/blogs/compute/robust-serverless-application-design-with-aws-lambda-dlq/>

NEW QUESTION: 3

SQSを使用して顧客の注文を処理するオンラインストアをAWSで構築しています。バックエンドシステムには、顧客の注文と同じ順序でこれらのメッセージが必要です。どうすればそれを実現できますか？**A.** SQSでこれを行うことができますが、SWFを使用する必要もあります**B.** 各メッセージでシーケンス情報を使用できます**C.** SQSでこれを行うことはできません**D.** メッセージはデフォルトで同じ順序で到着します**Answer: B**Explanation:ExplanationAmazon SQS is engineered to always be available and deliver messages. One of the resulting tradeoffs is that SQS does not guarantee first in, first out delivery of messages. For many distributed applications, each message can stand on its own, and as long as all messages are delivered, the order is not important. If your system requires that order be preserved, you can place sequencing information in each message, so that you can reorder the messages when the queue returns them.
