Many candidates may wonder there are so many kinds of exam dumps or tools in the market why should you choose our AZ-800 test braindumps.

**NEW QUESTION: 1** Using a 365-day year, if a firm has net annual sales of \$250,000 and average receivables of \$150,000, what is its average collection period?**A.** 219.0 days.**B.** 1.7 days.**C.** 46.5 days.**Answer: A**  
**Explanation:**  $\text{Receivables turnover} = \$250,000 / \$150,000 = 1.66667$   
 $\text{Collection period} = 365 / 1.66667 = 219 \text{ days}$

**NEW QUESTION: 2** Your company has recently extended its datacenter into a VPC on AWS to add burst computing capacity as needed. Members of your Network Operations Center need to be able to go to the AWS Management Console and administer Amazon EC2 instances as necessary. You don't want to create new IAM users for each NOC member and make those users sign in again to the AWS Management Console. Which option below will meet the needs for your NOC members?**A.** Use your on-premises SAML 2.0-compliant identity provider (IDP) to retrieve temporary security credentials to enable NOC members to sign in to the AWS Management Console.**B.** Use your on-premises SAML 2.0-compliant identity provider (IDP) to grant the NOC members federated access to the AWS Management Console via the AWS single sign-on (SSO) endpoint.**C.** Use web Identity Federation to retrieve AWS temporary security credentials to enable your NOC members to sign in to the AWS Management Console.**D.** Use OAuth 2.0 to retrieve temporary AWS security credentials to enable your NOC members to sign into the AWS Management Console.**Answer: A**

**NEW QUESTION: 3** A user has setup an application on EC2 which uses the IAM user access key and secret access key to make secure calls to S3. The user wants to temporarily stop the access to S3 for that IAM user. What should the root owner do?**A.** Stop the instance**B.** Delete the IAM user**C.** Change the access key and secret access key for the user**D.** Disable the access keys for the IAM user**Answer: D**  
**Explanation:** If the user wants to temporarily stop the access to S3 the best solution is to disable the keys. Deleting the user will result in a loss of all the credentials and the app will not be useful in the future. If the user stops the instance IAM users can still access S3. The change of the key does not help either as they are still active. The best possible solution is to disable the keys.
