Explanation: Explanation/Reference: If you have a backup, out-of-path Steelhead appliance in your system (that is, failover support), for Backup Appliance IP Address, specify the IP address and port for the backup appliance in the Backup IP and Port text boxes. Use the format 0.0.0.0/0. The default port is 7810. Note: Out-of-Path - The SteelHead isn't in the direct path between the client and the server. Servers see the IP address of the server-side SteelHead rather than the client IP address, which might impact security policies. An out-of-path configuration is suitable for data center locations where physically in-path or virtually in-path configurations aren't possible. References: Steelhead Appliance Installation and Configuration Guide, Version 7.0.3, May 2012, page 44
