NEW QUESTION: 1 Which of the following components of a quality management plan is an initial quality measurement?**A.** Quality assurance**B.** Quality specifications**C.** Quality baseline**D.** Quality control**Answer: C**

NEW QUESTION: 2 A company wants to design an internal website for the purpose of managing its numerous social events. The site will not have heavy traffic, but will require state to be persisted in a database. You have been tasked to complete this action item in your spare time. Which two Java EE-based approaches are best suited for quick development?**A.** Use your domain model components as JavaServer Faces (JSF) managed beans.**B.** Use JPA in the web tier only.**C.** Use an Enterprise javaBeans (EJB) container to service-inject the domain model and support a JPA deployment.**D.** Use message-driven beans to manage the posting of events.

Answer: A,B

NEW QUESTION: 3 Which of the following would an organization MOST likely have users sign before granting administrative access?**A.** An ND**B.** A PU**C.** An AUP**D.** A DLP**Answer: C**

Explanation:**NDA:** It is a contract through which the parties agree not to disclose information covered by the agreement. An NDA creates a confidential relationship between the parties, typically to protect any type of confidential and proprietary information or trade secrets. As such, an NDA protects non-public business information.**PUA:** Potentially Unwanted Applications) are programs that, while not especially malicious, generally diminish the user experience by consuming valuable computer resources, tracking users, displaying advertisements, or allowing the installation of additional third party software. The PUA category provides users with increased insight and control over their computers by detecting applications that are not categorized as malware, but that users may not want installed on their computer or network.**AUP:** An acceptable use policy (AUP) is a document stipulating constraints and practices that a user must agree to for access to a corporate network or the Internet.**DLP:** Data loss prevention (DLP) is an approach that seeks to improve information security and protect business information from data breaches. It prevents end-users from moving key information outside the network. DLP also refers to tools that enable a network administrator to monitor data accessed and shared by end users.
