At the same time, we will provide you some discounts.

NEW QUESTION: 1 Refer to the exhibit. Which out-of-dialog SIP OPTIONS ping response put dial-peer tag 1111 into its current operational state? **A.** 408 Request Timeout **B.** 503 Service Unavailable **C.** 501 Not Implemented **D.** 486 Busy Here **E.** 504 Server Time-out **Answer: B**
Explanation: Explanation/Reference: Explanation: SIP 503 Service Unavailable is commonly seen in a VoIP network when a SIP device (such as a SIP server) is knowingly unable to process a call. Typically when this happens the endpoint that originated the Invite will try the next available host it receives in the SIP Contact header.

NEW QUESTION: 2 A client is admitted to the labor unit. On vaginal examination, the presenting part in a cephalic presentation was at station plus two. Station 12 means that the: **A.** Presenting part is 2 cm below the level of the ischial spines **B.** Biparietal diameter is 5 cm above the ischial spines **C.** Presenting part is 2 cm above the level of the ischial spines **D.** Biparietal diameter is at the level of the ischial spines **Answer: A**
Explanation: Explanation (A) Station is the relationship of the presenting part to an imaginary line drawn between the ischial spines. If the presenting part is above the ischial spines, the station is negative. (B) When the biparietal diameter is at the level of the ischial spines, the presenting part is generally at a +4 or +5 station. (C) Station is the relationship of the presenting part to an imaginary line drawn between the ischial spines. If the presenting part is below the ischial spines, the station is positive. Thus, 2 cm below the ischial spines is the station +2. (D) When the biparietal diameter is above the ischial spines by 5 cm, the presenting part is usually engaged or at station 0.

NEW QUESTION: 3 The server health monitoring mechanisms detects the backend server on a company's true USG firewall (three servers to Server A, Server B, and Server C) is running. When the USG repeatedly receives server B's response packet, it will prohibit the use of server B and follow configured policies assigned to other servers. **A.** FALSE **B.** TRUE **Answer: B**
