Most candidates want to pass C_TS411_2022 Certification exam but couldn't find the best way to prepare it.

NEW QUESTION: 1 Fred is a network technician working for Johnson Services, a temporary employment agency in Boston. Johnson Services has three remote offices in New England and the headquarters in Boston where Fred works. The company relies on a number of customized applications to perform daily tasks and unfortunately these applications require users to be local administrators. Because of this, Fred's supervisor wants to implement tighter security measures in other areas to compensate for the inherent risks in making those users local admins. Fred's boss wants a solution that will be placed on all computers throughout the company and monitored by Fred. This solution will gather information on all network traffic to and from the local computers without actually affecting the traffic. What type of solution does Fred's boss want to implement? **A.** Fred's boss wants a NIDS implementation. **B.** Fred's boss wants to implement a HIDS solution. **C.** Fred's boss wants Fred to monitor a NIPS system. **D.** Fred's boss wants to implement a HIPS solution. **Answer: B**

NEW QUESTION: 2 You want to reset SIC between smberlin and sgosaka. In SmartDashboard, you choose sgosaka, Communication, Reset. On sgosaka, you start cpconfig, choose Secure Internal Communication and enter the new SIC Activation Key. The screen reads The SIC was successfully initialized and jumps back to the menu. When trying to establish a connection, instead of a working connection, you receive this error message: What is the reason for this behavior? **A.** The Check Point services on the Gateway were not restarted because you are still in the cpconfig utility. **B.** The Gateway was not rebooted, which is necessary to change the SIC key. **C.** You must first initialize the Gateway object in SmartDashboard (i.e., right-click on the object, choose Basic Setup > Initialize). **D.** The activation key contains letters that are on different keys on localized keyboards. Therefore, the activation can not be typed in a matching fashion. **Answer: A**

NEW QUESTION: 3 What is the purpose of configuring a VMkernel port for Fault Tolerance logging? **A.** The selected vmkernel port is able to log Fault Tolerance events to a syslog server. **B.** The selected vmkernel port is able to maintain a log of changes to the secondary virtual machine. **C.** The selected vmkernel port is used to send external inputs from a primary virtual machine to its secondary counterpart. **D.** The selected vmkernel port is used to trigger a failover from the primary machine if a hardware crash occurs. **Answer: C**
