If you buy our 2V0-51.23 preparation questions, we can promise that you can use our study materials for study in anytime and anywhere.

NEW QUESTION: 1 Welche der folgenden Möglichkeiten kann verwendet werden, um ein kabelgebundenes Netzwerk mithilfe eines Adapters und einer Steckdose zu erweitern?
A. Schicht 3-Schalter
B. Repeater
C. Patchfeld
D. Ethernet über Strom
Answer: B

NEW QUESTION: 2 A WHERE clause in SQL specifies that a SQL Data Manipulation Language (DML) statement should only affect rows that meet specified criteria. The criteria are expressed in the form of predicates. WHERE clauses are not mandatory clauses of SQL DML statements, but can be used to limit the number of rows affected by a SQL DML statement or returned by a query. A pen tester is trying to gain access to a database by inserting exploited query statements with a WHERE clause. The pen tester wants to retrieve all the entries from the database using the WHERE clause from a particular table (e.g. StudentTable). What query does he need to write to retrieve the information?
A. RETRIVE * FROM StudentTable WHERE roll_number = 1
#B. SELECT * FROM StudentTable WHERE roll_number = '' or '1' = '1'
C. DUMP * FROM StudentTable WHERE roll_number = 1 AND 1=1
D. EXTRACT* FROM StudentTable WHERE roll_number = 1 order by 1000
Answer: B

NEW QUESTION: 3 What is the name of the API used to access multiple portions of NetProfiler, including the UI, host groups, and services?
A. Full access API
B. Network management API
C. Network traffic API
D. REST API
E. RAND API
Answer: D

NEW QUESTION: 4 neo user tried by: dd if=/dev/zero of=/home/neo/somefile bs=1024 count=70 files created successfully. Again neo tried to create file having 70K using following command: dd if=/dev/zero of=/home/neo/somefile bs=1024 count=70 But he is unable to create the file. Make the user can create the file less then 70K.
A. Very Tricky question from redhat. Actually question is giving scenario to you to implement quota to neo user. You should apply the quota to neo user on /home that neo user shouldn't occupied space more than 70K.
1. vi /etc/fstab LABEL=/home /home ext4 defaults,usrquota 0 0 -> To enable the quota on filesystem you should mount the filesystem with usrquota for user quota and grpquota for group quota.
touch /home/aquota.user -> Creating blank quota database file.
mount -o remount /home -> Remounting the /home with updated mount options. You can verify that /home is mounted with usrquota options or not using mount command.
quotacheck -u /home -> Initialization the quota on /home
edquota -u neo /home -> Quota Policy editor
See the snapshot 1 Disk quotas for user neo (uid 500):
2 Filesystem blocks soft hard inodes soft hard
4 /dev/mapper/vo-myvol 2 31

75 1 1 1 Can you set the hard limit 70 and soft limit as you think like 50. Verify using the repquota /home command.**B.** Very Tricky question from redhat. Actually question is giving scenario to you to implement quota to neo user. You should apply the quota to neo user on /home that neo user shouldn't occupied space more than 70K.1. vi /etc/fstab LABEL=/home /home ext3 defaults,usrquota 0 0 -> To enable the quota on filesystem you should mount the filesystem with usrquota for user quota and grpquota for group quota.touch /home/aquota.user-> Creating blank quota database file.mount -o remount /home ->Remounting the /home with updated mount options. You can verify that /home is mounted with usrquota options or not using mount command.**C.** Very Tricky question from redhat. Actually question is giving scenario to you to implement quota to neo user. You should apply the quota to neo user on /home that neo user shouldn't occupied space more than 70K.1. vi /etc/fstab LABEL=/home /home ext3 defaults,usrquota 0 0 -> To enable the quota on filesystem you should mount the filesystem with usrquota for user quota and grpquota for group quota. touch /home/aquota.user-> Creating blank quota database file.mount -o remount /home ->Remounting the /home with updated mount options. You can verify that /home is mounted with usrquota options or not using mount command.quotacheck -u /home ->Initialization the quota on /homeedquota -u neo /home-> Quota Policy editorSee the snapshot 1 Disk quotas for user neo (uid 500): 2 Filesystem blocks soft hard inodes soft hard4 /dev/mapper/vo-myvol 2 30 70 1 0 0 Can you set the hard limit 70 and soft limit as you think like 30. Verify using the repquota /home command.**Answer: C**
