**NEW QUESTION: 1** Out of the stripping options available for the EBS volumes, which one has the following disadvantage: 'Doubles the amount of I/O required from the instance to EBS compared to RAID 0, because you're mirroring all writes to a pair of volumes, limiting how much you can stripe.' ?  
**A.** Raid 1 **B.** Raid **C.** RAID 1+0 (RAID 10) **D.** Raid 0  
**Answer: C**  
**Explanation:** <http://docs.aws.amazon.com/AWSEC2/latest/WindowsGuide/raid-config.html> RAID 0 and 1 are the common types. RAID 5 and 6 are not recommended because of the extended stripe. If you encounter this question on the exam I suspect the answer options will be different.  
**Raid 1 Disadvantage:** Does not provide a write performance improvement; requires more Amazon EC2 to Amazon EBS bandwidth than non-RAID configurations because the data is written to multiple volumes simultaneously.  
**Raid 0 Disadvantage:** Performance of the stripe is limited to the worst performing volume in the set. Loss of a single volume results in a complete data loss for the array.  
**Raid 5 and 6 notes:** RAID 5 and RAID 6 are not recommended for Amazon EBS because the parity write operations of these RAID modes consume some of the IOPS available to your volumes. Depending on the configuration of your RAID array, these RAID modes provide 20-30% fewer usable IOPS than a RAID 0 configuration. Increased cost is a factor with these RAID modes as well; when using identical volume sizes and speeds, a 2-volume RAID 0 array can outperform a 4-volume RAID 6 array that costs twice as much.

**NEW QUESTION: 2** When a packet arrives at the gateway, the gateway checks it against the rules in the top Policy Layer, sequentially from top to bottom, and enforces the first rule that matches a packet. Which of the following statements about the order of rule enforcement is true?  
**A.** If the Action is Accept, the gateway continues to check rules in the next Policy Layer down.  
**B.** If the Action is Drop, the gateway applies the Implicit Clean-up Rule for that Policy Layer.  
**C.** If the Action is Accept, the gateway allows the packet to pass through the gateway.  
**D.** If the Action is Drop, the gateway continues to check rules in the next Policy Layer down.  
**Answer: A**

**NEW QUESTION: 3** You are the program manager for your organization and are working on gathering the requirements for a new solution and mission statement. There are several instances in the stakeholder pool where the stakeholders and their manager are being queried on possible requirements. You worry that the subordinates may have requirements, ideas, and suggestions to offer but they may be not submitting their thoughts because they do not want to contradict their managers. You believe you need a method to gather all requirements without the stakeholders having any fear of retribution. Which one of the following allows you to anonymously gather iterations requirements and still allow for all stakeholders to review what has been submitted in an attempt to find consensus?**A. Web surveys****B. Focus groups****C. Workshops****D. Delphi Technique****Answer: D**
