But once you have looked through our statistics about [Education-Cloud-Consultant](#) the pass rate from the year, you will be undoubtedly convinced by what I have mentioned above.

### NEW QUESTION: 1

バンキングプラットフォームは、Dockerコンテナを展開に使用するマイクロサービスベースのアーキテクチャに再設計されました。Oracle Cloud

Infrastructure (OCI) にコンテナをデプロイするために使用できるサービスはどれですか？ **A.**

API Gateway **B.** Container Engine for Kubernetes (OKE) **C.** Streaming Service **D.** File Storage

**Service** **Answer: B** Explanation: Explanation Oracle Cloud Infrastructure Container Engine for Kubernetes is a fully-managed, scalable, and highly available service that you can use to deploy your containerized applications to the cloud. Use Container Engine for Kubernetes (sometimes abbreviated to just OKE) when your development team wants to reliably build, deploy, and manage cloud-native applications. You specify the compute resources that your applications require, and Container Engine for Kubernetes provisions them on Oracle Cloud Infrastructure in an existing OCI tenancy. Container Engine for Kubernetes uses Kubernetes - the open-source system for automating deployment, scaling, and management of containerized applications across clusters of hosts. Kubernetes groups the containers that make up an application into logical units (called pods) for easy management and discovery. You can access Container Engine for Kubernetes to define and create Kubernetes clusters using the Console and the REST API. You can access the clusters you create using the Kubernetes command line (kubectl), the Kubernetes Dashboard, and the Kubernetes API. Container Engine for Kubernetes is integrated with Oracle Cloud Infrastructure Identity and Access Management (IAM), which provides easy authentication with native Oracle Cloud Infrastructure identity functionality.

**NEW QUESTION: 2** You have Purchase Order approval authority In Grade I Business Suite

Release 12. You are planning to go on vacation for three weeks without access to email.) 11 Select four ways in which you can manage Workflow notifications using Advanced worklist options in your absence.
