**NEW QUESTION: 1**A company has a website that is developed in PHP and WordPress and is launched using AWS Elastic Beanstalk. There is a new version of the website that needs to be deployed in the Elastic Beanstalk environment. The company cannot tolerate having the website offline if an update fails.Deployments must have minimal impact and rollback as soon as possible.What deployment method should be used?**A.** Snapshots**B.** Rolling**C.** All at once**D.** Immutable**Answer: A**

**NEW QUESTION: 2**What is a typical grid computing usage scenario?**A.** Users run applications on a computing infrastructure comprised by a collection of homogeneous nodes that share I/O facilities, operating system processes, and appear as single system.**B.** Users get root access to remote instances and install and deploy their own applications configuring the environment for executing MPI applications.**C.** Developers build applications that require a large number of computing resources beyond the size of the local department computing facilities and submit the application for execution to internet scale computing infrastructures.**D.** Developers have a limited amount of investments for running their web applications and decide to leverage Computing as a Service solutions to increase their investments in computer resources as their applications become more popular.**Answer: A**

**NEW QUESTION: 3A.** TOTP**B.** CHAP**C.** PAP**D.** HOTP**Answer: D**Explanation:ExplanationThe question states that the HMAC counter-based codes and are valid until they are used. These are "one-time" use codes.HOTP is an HMAC-based one-time password (OTP)algorithm.HOTP can be used to authenticate a user in a system via an authentication server. Also, if some more steps are carried out (the server calculates subsequent OTP value and sends/displays it to the user who checks it against subsequent OTP value calculated by his token), the user can also authenticate the validation server.Both hardware and software tokens are available from various vendors. Hardware tokens implementing OATH HOTP tend to be significantly cheaper than their competitors based onproprietary algorithms. Some products can be used for strong passwords as well as OATH HOTP.Software tokens are available for (nearly) all major mobile/smartphone platforms.

**NEW QUESTION: 4**You have a container image that contains an AI solution. The solution will be used on demand and will only be needed a few hours each month.You plan to use Azure Functions to deploy the environment on-demand.You need to recommend the deployment process. The solution must minimize costs.Which four actions should you recommend Azure

Functions perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.**Answer:** Explanation: Explanation1. Create ACI 2. pull image 3. run AI solution 4. delete ACI
