One is to learn exam related knowledge Professional-Cloud-Database-Engineer certification test demands, Just have a try on our free demo of Professional-Cloud-Database-Engineer exam questions!

**NEW QUESTION: 1** Refer to the exhibit. The site in this AirMagnet Survey heat map is ready for which level of service? **A.** voice **B.** RFID **C.** data **D.** location **Answer: C**

**NEW QUESTION: 2** Which of the following methods can be used to update the trusted log server regarding the policy and configuration changes performed on the Security Management Server? **A.** install Policy **B.** Save Session **C.** install Database **D.** Save Policy **Answer: A**

**NEW QUESTION: 3** A company has an on-premises Microsoft SQL Server 2016 environment. All futures databases must meet the following requirements: \* The recovery model must be set to simple. \* The compatibility level must be set to SQL server 2014 (120). \* Your need to configure the SQL server 2016 environment. In the table below, identify the database you must modify for each requirement. **Answer:** Explanation: Explanation Model: Change from full to simple Recovery Model Newly created user databases use the same recovery model as the model database. The model database is used as the template for all databases created on an instance of SQL Server. Because tempdb is created every time SQL Server is started, the model database must always exist on a SQL Server system. The entire contents of the model database, including database options, are copied to the new database. Model: Set compatibility level to 120 For all installations of SQL Server, the default compatibility level is set to the version of the Database Engine. Databases are set to this level unless the model database has a lower compatibility level. References:
